

CONTENTS

Introduction	1
------------------------	---

Part I: General theory

§0. Preamble: definitions, change of universe, and split G -spectra	14
§1. Invariance properties of the functors $f, c,$ and t	20
§2. Basic properties of the theories represented by $f(k_G), c(k_G),$ and $t(k_G)$	23
§3. Homotopical behavior of the functors $f, c,$ and t	26
§4. Completion at the augmentation ideal of the Burnside ring	30
§5. Transfer and the fixed point spectra of Tate G -spectra	37

Part II: Eilenberg-MacLane G -spectra and the spectral sequences

§6. Eilenberg-MacLane G -spectra and their associated theories	43
§7. Mackey functors and coefficient systems	48
§8. Products in the theories associated to Eilenberg-MacLane G -spectra	52
§9. Chain level calculation of the coefficient groups	55
§10. The $f, c,$ and t Tate Atiyah-Hirzebruch spectral sequences	61

Part III: Specializations and calculations

§11. Tate-Swan cohomology and the spectral sequences for finite groups	68
§12. Some remarks on nonequivariant stable homotopy theory	74
§13. The Tate K -theory of finite groups and related calculations	78
§14. Cyclic cohomology and the spectral sequences for the circle group	83
§15. Calculations in homotopy and K -theory for the circle group	90
§16. Free G -spheres and periodicity phenomena	94

Part IV: The generalization to families

§17. Families and their $f, c,$ and t G -spectra	98
§18. Cohomological and homological completion phenomena	104

§19. The generalized Tate G -spectra of periodic K -theory	107
§20. Theories associated to Mackey functors and coMackey functors	113
§21. Amitsur-Dress-Tate cohomology theories	119
§22. The generalized Tate Atiyah-Hirzebruch spectral sequences	124
§23. Some calculational methods and examples: groups of order pq	129
§24. Equivariant root invariants of stable homotopy groups of spheres	135
§25. Proof of the root invariant theorem	142
Appendix A: Splittings of rational G -spectra for finite groups G	146
Appendix B: Generalized Atiyah-Hirzebruch spectral sequences	154
Bibliography	164
Index	168
