

Table of Contents

Introduction	1
Chapter I : Linear groups of cohomogeneity < 4	7
Chapter II : Determination of weight patterns	15
§1 : A review of the geometric weight system and some basic techniques	15
§2 : Actions of small groups	22
§3 : Actions of simple groups	36
§4 : Analysis of weight patterns in general	48
Chapter III : Fixed point results of P.A.Smith type	71
Chapter IV : Classification of compact connected Lie transformation groups on spheres with cohomogeneity one	75
§1: Basic facts and constructions	75
§2 : G-spheres of cohomogeneity one. Proof of Theorem C	77
Appendix : Table I, II, III; $c(\Phi) \leq 3$	82
