

CONTENTS

Introduction	1
Section 1. Borel-fixed ideals	6
Section 2. Monomial orders	11
Section 3. Some algebraic lemmas	20
Section 4. Defining the higher initial ideals	22
Section 5. Representing the higher initial ideals	30
Section 6. Group action on $R^{s+1}(I)$	33
Section 7. Describing the action on $R^{s+1}(I)$	38
Section 8. Borel-fixedness	43
Section 9. Higher initial ideals of hyperplane sections	47
Section 10. Representing the higher initial ideals of general hyperplane sections	51
Section 11. Higher initial ideals as combinatorial structures	52
Section 12. Reading cohomological information	54
Section 13. Examples : Points and curves in \mathbf{P}^3	59
