

CONTENTS

Abstract	viii
§1 Introduction and Statement of Results	1
§2 Glossary of notation and conventions	13
§3 Gorenstein del Pezzo surfaces	15
§4 Bug-Eyed covers	20
§5 Log deformation theory	26
§6 Criteria for log uniruledness	32
§7 Reduction to $\pi_1^{\text{alg}}(S^0) = \{1\}$	41
§8 Flushness and Preparation for the Hunt	44
§9 Bogomolov Bound	67
§10 Riemann Roch and Surfaces with Small Coefficient	69
§11 A partial classification of K_T -contractions	72
§12 The linear system $ K_S + A $	88
§13 Classification of Bananas and Fences	92
§14 T_1 a net	97
§15 $g(A_1) > 1$	99
§16 A_1 has a simple cusp	106
§17 A_1 has a simple node	109
§18 A_1 smooth	117
§19 The smooth banana	123
§20 Proof of (1.1) and corollaries	128
§21 A surface with $\pi_1^{\text{alg}}(S^0) = \{1\}$ but no tiger	130
§22 Tigers, complements and toric pairs	133
§23 Classification of almost all rank one log del Pezzos	137
§L Appendix: Log terminal surface singularities and adjunction	146
§N Appendix: Normalisation of an algebraic space	149
Index to Obscure or unconventional notation	150
References	151
