Introduction	ix
Acknowledgements	xiv
Chapter 1. Preliminaries	1
1.1. Cohomology with coefficients in a local system	1
1.2. Characteristic varieties	4
1.3. $C^\infty$ log complex of quasi-projective algebraic varieties	8
Chapter 2. Ring structure of $H^\bullet(\mathbb{P}^2 \setminus \mathcal{R}; \mathbb{C})$	15
2.1. The spaces $H^k(\mathbb{P}^2 \setminus \mathcal{D}; \mathbb{C})$ and the residue maps	15
2.2. Logarithmic forms on non-normal crossing divisors	18
2.3. A basis for $H^1(\mathbb{P}^2 \setminus \mathcal{D}; \mathbb{C})$	19
2.4. The problem with the 2-forms	21
2.5. Logarithmic ideals	23
2.6. Construction of logarithmic trees	30
2.7. A holomorphic presentation for $H^2(\mathbb{P}^2 \setminus \mathcal{R}; \mathbb{C})$	38
2.8. The product in $H^\bullet(\mathbb{P}^2 \setminus \mathcal{R}; \mathbb{C})$	44
Chapter 3. Generalized Aomoto Complexes	47
3.1. Combinatorial type of an arrangement	48
3.2. The complex $(A_c^\bullet, \omega_c)$	49
3.3. An equivalence of complexes	54
Chapter 4. Characteristic varieties, local systems and rational arrangements	57
4.1. GAC's and cohomology of local systems	57
4.2. GAC's and characteristic varieties	60
Chapter 5. Examples	63
Bibliography	74
