

Contents

Chapter 1. Introduction	1
Chapter 2. Complete affine flows	9
1. Theorem of Nagano-Yagi and its application	9
2. Nilpotent holonomy	13
3. Periodic orbit case	15
4. No periodic orbit case	18
Chapter 3. Luxuriant Foliations	23
1. Luxuriant foliations	23
2. Horizontal flow on a leaf of \mathcal{F}	24
3. Minimality of the foliation \mathcal{F}	25
4. Nontriviality of the holonomy of \mathcal{F}	27
5. Topology of the flow φ	29
Chapter 4. SL-flows	33
1. SL-flows are horizontal	33
2. Solvable case	34
3. Fuchsian case	35
4. The homotopy lifting property	39
5. Dense Case	50
Chapter 5. SA-flows	53
1. Preliminaries	53
2. Affine subsurfaces	56
3. Elliptic and parabolic periodic orbits	64
4. The characteristic subgroup	69
5. K is trivial; no periodic orbits case	71
6. K is trivial; periodic orbits case	81
7. Case K is nontrivial	89
Bibliography	93
