

Contents

Introduction	1
Chapter 1. The ℓ -adic Formalism	7
1. Quotients of t-Categories	7
2. ℓ -Adic Derived Categories	9
2.1. Functoriality	11
Chapter 2. Stratifications	15
1. d-Structures	15
2. cd-Structures	17
Chapter 3. Topoi	21
1. Fibered Topoi	21
2. Constructible Sheaves	24
3. Constructible ℓ -Adic Sheaves	26
4. Topoi with c-Structures and ℓ -Adic Derived Categories	29
5. The d-Structures Defined by c-Topoi	34
6. Topoi with e-Structures	37
Chapter 4. Algebraic Stacks	41
1. Preliminaries on Algebraic Stacks	41
1.1. Gerbe-Like morphisms	41
1.2. Devissage for Algebraic Stacks	43
1.3. Universal Homeomorphisms	45
2. The Étale Topos of an Algebraic Stack	46
2.1. The Flat Topos	46
2.2. The Étale Topos	47
3. The Smooth Topos	48
4. The Simplicial Approach	51
4.1. The d-structures defined by the simplicial c-topos	52
5. The Smooth Approach	53
6. The Étale-Smooth cd-Structure	57
7. The ℓ -Adic d-Structure	62
7.1. Closed L-Stratifications	62
7.2. Some more auxiliary results	64
7.3. The Main Theorem	65
8. Purity and Extraordinary Pullbacks	67

Chapter 5. Convergent Complexes	73
1. \overline{Q}_ℓ -Complexes	73
1.1. A Theorem of Borel	75
2. Frobenius	75
3. Mixed and Convergent Complexes	78
3.1. Convergence	79
4. The Trace Formula	82
4.1. More about Frobenius	82
4.2. Trace of Frobenius	84
4.3. An Example	89
Bibliography	93
