| Introduction | ix |
| Acknowledgments: | xvi |
| Part 1. Fredholm theory for 0-pseudodifferential operators | 1 |
| Chapter 1. Review on basic objects of 0-geometry | 3 |
| 1.1. The 0-structure algebra | 3 |
| 1.2. The extended 0-blow up | 4 |
| 1.3. Relation to the 0-double space X_0^2 | 6 |
| 1.4. The extended 0-triple space $X_{0,e}^3$ | 7 |
| 1.5. 0-densities | 9 |
| Chapter 2. The small 0-calculus and the 0-calculus with bounds | 11 |
| 2.1. The Schwartz kernel theorem revisited | 11 |
| 2.2. The small 0-calculus | 11 |
| 2.3. Basic properties of the small 0-calculus | 12 |
| 2.4. The 0-calculus with bounds | 15 |
| 2.5. Basic properties of the 0-calculus with bounds | 17 |
| 2.6. The indicial function | 17 |
| 2.7. General bundles | 18 |
| Chapter 3. The b - c -calculus on an interval | 19 |
| 3.1. The b - c -structure algebra | 19 |
| 3.2. The b - c -double space | 19 |
| 3.3. b - c -densities | 21 |
| 3.4. The b - c -calculus with bounds | 21 |
| 3.5. Basic properties of the b - c -calculus | 22 |
| 3.6. Fredholm theory for the b - c -calculus | 24 |
| 3.7. Invariance of the b - c -calculus under the \mathbb{R}_+ -action | 25 |
| 3.8. C^* -algebras of b - c -operators | 26 |
| 3.9. General bundles | 27 |
| Chapter 4. The reduced normal operator | 29 |
| 4.1. Definition of the reduced normal operator | 29 |
| 4.2. Coordinate invariance of the reduced normal operator | 30 |
| 4.3. Scale invariance of the reduced normal operator | 31 |
| 4.4. Characterization of the reduced normal operator | 32 |
| 4.5. Basic properties of the reduced normal operator | 40 |
| 4.6. The case of 0-differential operators | 42 |
| 4.7. General bundles | 43 |

| | |
|--|-----------|
| Chapter 5. Weighted 0-Sobolev spaces | 45 |
| 5.1. Boundedness of 0-operators of order 0 on L^2 -spaces | 45 |
| 5.2. Weighted 0-Sobolev spaces | 47 |
| 5.3. General bundles | 48 |
| Chapter 6. Fredholm theory for 0-pseudodifferential operators | 49 |
| 6.1. Symbol reproducing families | 49 |
| 6.2. Characterization of Fredholm operators in $\Psi_0^0(X; {}^0\Omega^{1/2})$ | 50 |
| 6.3. Characterization of Fredholm operators in $\Psi_0^{m,k}(X; {}^0\Omega^{1/2})$ | 53 |
| 6.4. General bundles | 54 |
| Part 2. Algebras of 0-pseudodifferential operators of order 0 | 55 |
| Chapter 7. C^* -algebras of 0-pseudodifferential operators | 57 |
| 7.1. Solvable C^* -algebras | 57 |
| 7.2. The reduced normal operator on $S^*\partial X$ | 57 |
| 7.3. Extension of the symbolic structure | 58 |
| 7.4. The C^* -algebra generated by the reduced normal operator | 59 |
| 7.5. The C^* -algebra $\mathcal{B}_0^{(a)}(X, {}^0\Omega^{1/2})$ | 62 |
| 7.6. The spectrum of the C^* -algebra $\mathcal{B}_0^{(a)}(X, {}^0\Omega^{1/2})$ | 63 |
| Chapter 8. Ψ^* -algebras of 0-pseudodifferential operators | 69 |
| 8.1. Submultiplicative Ψ^* -algebras | 69 |
| 8.2. Ψ^* -completions of b - c - and 0-calculus | 70 |
| Appendix A. Spaces of conormal functions | 73 |
| Bibliography | 79 |
| Notations | 85 |
| Index | 89 |
