Abstract	vii
Chapter 1. Background	1
Chapter 2. Summary	9
Chapter 3. Weighted projective lines	17
3.1. Basic notations	17
3.2. Exceptional sheaves	22
3.3. Perpendicular categories	25
Chapter 4. Mutations of exceptional sequences	27
4.1. Exceptional sequences	27
4.2. The braid group action on the set of exceptional sequences	28
4.3. Transitivity of the braid group action	30
4.4. Bijections between exceptional sheaves	34
4.5. Coprimeness of rank and degree	35
Chapter 5. Tubular mutations	37
5.1. Mutations as derived equivalences for sheaves on weighted projective lines of genus one	37
5.2. Telescopic functors	39
5.3. Automorphisms of the derived category	43
Chapter 6. Twisted mutations	47
6.1. Admissible exceptional pairs	47
6.2. Twisted mutations of admissible exceptional pairs	49
Chapter 7. On the number of exceptional vector bundles	55
7.1. Equations and inequalities for exceptional bundles	55
7.2. A bound for the number of exceptional bundles of fixed rank and degree	57
7.3. Omnipresent exceptional vector bundles	58
Chapter 8. Tilting sheaves	65
8.1. Concealed-canonical and almost concealed-canonical algebras	65
8.2. Regular components	69
8.3. The wing decomposition of a tilting bundle	71
8.4. Non-regular components for concealed-canonical algebras	74
8.5. Non-regular components for almost concealed-canonical algebras	80
Chapter 9. Tilting complexes	83

9.1.	Tilting complexes and exceptional sequences	83
9.2.	Tilting complexes for weighted projective lines with parameters	85
9.3.	Branch enlargements of concealed-canonical algebras	88
9.4.	Tilting complexes for domestic weighted projective lines	99
9.5.	Tilting complexes for tubular weighted projective lines	100
Chapter 10.	Hyperelliptic weighted projective lines	103
10.1.	Structure of a tilting complex on a hyperelliptic weighted projective line	103
10.2.	Diophantine equations	106
10.3.	Layered algebras	108
10.4.	Tame algebras derived equivalent to hyperelliptic algebras	113
10.5.	Tame algebras derived equivalent to t -subspace problem algebras	116
10.6.	Proofs of the classification results	119
	Bibliography	133
	Index	139
