

Contents

Introduction	vii
Chapter 1. Automorphisms of the affine plane	1
1.1. Blowing ups and graphs	1
1.2. Automorphisms of the affine plane	2
Chapter 2. A partition on $\mathbb{C}[x, y]$	13
2.1. Parental systems and graphs	13
2.2. The partition	20
2.3. Automorphisms and orderings of graphs	26
Chapter 3. The geometry of the partition	29
3.1. Basic definitions	29
3.2. Varieties parametrizing infinitely near points	30
3.3. The algebraicity of the subsets of the partition	37
3.4. The geometry of the subsets of the partition	44
Chapter 4. The action of $Aut(\mathbb{C}^2)$ on $\mathbb{C}[x, y]$	61
4.1. The action of $Aut(\mathbb{C}^2)$ at the combinatorial level	61
4.2. Degree and composition by automorphisms	67
4.3. Invariance of the behaviour graph by translations on the left	71
Chapter 5. The moduli problem	77
5.1. The moduli problem: groupoid approach	77
5.2. Comparison of groupoids	81
Chapter 6. The moduli spaces	89
6.1. Combinatorial preliminaries	89
6.2. Construction of the moduli spaces	94
6.3. On the geometry of the moduli spaces	121
Appendix A. Canonical orders	127
Appendix. Bibliography	135
