

Contents

Chapter 1. Introduction	1
Chapter 2. Cartan decomposition and the Generalized elastic problems	19
Chapter 3. The Maximum Principle and the Hamiltonians	25
Chapter 4. The left-invariant symplectic form	35
Chapter 5. Symmetries and the conservation laws	52
Part 2. Complex Lie groups and complex Hamiltonians	
Chapter 6. Complexified elastic problems	59
Chapter 7. Complex elasticae of Euler and its n -dimensional extensions	66
Chapter 8. Cartan algebras, root spaces and extra integrals of motion	92
Chapter 9. Elastic Curves for the case of Lagrange	98
Chapter 10. Elastic Curves for the case of Kowalewski	108
Bibliography	132
