

TABLE OF CONTENTS

Preface	xiii
1 Basic Results	1
2 Examples	19
3 Essential and Asymptotic sequences	23
4 Schenzel's Theorems	35
5 The relative Rees ring of I and J	43
6 Two asymptotic functions	49
7 Finite transforms	63
8 Essential primes and Projective extensions	77
9 Persistent primes and Projective extensions	87
10 Prime divisors of principal ideals	101
11 Sporadic primes	109
12 Irrelevant prime divisors of $uR(I)$	117
13 Generalizations to many ideals	125
14 Grade functions	135
15 Partial orderings on grade functions	149
References	161
Index	165
Index to symbols	167
