

CONTENTS

Preface.....	xi
Contributors.....	xiii
Stochastic control systems.....	1
HAN-FU CHEN AND LEI GUO	
Jump processes and particle systems.....	23
MU-FA CHEN AND SHI-JIAN YAN	
Multi-parameter stochastic processes.....	59
PEI-DE CHEN	
Stationary random field: predication theory, Markov models , limit theorems.....	79
TSE-PEI CHIANG	
Some results of semimartingales and jump processes.....	103
SHENG-WU HE AND JIA-GANG WANG	
Q-matrix problem.....	127
ZHEN-TING HOU	
Summary of recent research accomplishments in Markov processes and Markov fields at Wuhan University.....	149
DI-HE HU, LU-QIN LIU AND FU-QING GAO	
The study and development of probability problems in information theory in China.....	169
GUO-DING HU, ZHAO-ZHI ZHANG AND SHI-YI SHEN	
Some recent development of stochastic calculus in China.....	177
ZHI-YUAN HUANG	
Renewal sequences, p- functions, their extensions and related topics.....	187
ZHI-SHUN LIANG AND ZHI-RUI HUANG	

Brownian motions and the geometry of manifolds	207
MING LIAO	
Contribution to the limit theorems.....	221
ZHENG-YAN LIN, CHUAN-RONG LU AND QI-MAN SHAO	
Some new results concerning Dirichlet forms, Feynman-Kac semigroups and Schrödinger equations	239
ZHI-MING MA	
The reversibility and the entropy production of Markov processes	255
MIN-PING QIAN, MIN QIAN AND GUANG-LU GONG	
Theory and applications of stochastic differential equations in China.....	263
RONG SITU	
Progress concerning Brownian motion and classical potential theory in China.....	281
RONG WU AND QING-JI YANG	
Some recent results on the strong LLN and the LIL in Banach spaces	301
ZHI-QUAN WU, XIANG-CHEN WANG, XIAO-YUN YANG AND DE-LI LI	
A review of studies in probability theory and stochastic analysis.....	313
JIA-AN YAN	
On symmetric diffusion processes	329
WEI-AN ZHENG
