

Contents

Dedication	viii
Introduction	ix
Program of the conference	xi
List of participants	xiii
The torus and the disk R. L. ADLER	1
On the work of Roy Adler in ergodic theory and dynamical systems B. WEISS	19
The impact of Roy Adler's work on symbolic dynamics and applications to data storage B. MARCUS	33
LR conjugacies of shifts of finite type are uniquely so J. ASHLEY	57
A polynomial-time algorithm for deciding the forcing relation on cyclic permutations C. BERNHARDT AND E. M. COVEN	85
Fully positive topological entropy and topological mixing F. BLANCHARD	95
The stochastic shift equivalence conjecture is false M. BOYLE	107
Predictions with automata A. BROGLIO AND P. LIARDET	111
Common closing extensions and finitary regular isomorphism for synchro- nized systems D. FIEBIG	125
Covers for coded systems D. FIEBIG AND U.-R. FIEBIG	139

Z-numbers and β -transformations	
L. FLATTO	181
Quasisymmetric conjugacies for some one-dimensional maps inducing expansion	
M. JAKOBSON	203
A monotonicity property in one dimensional dynamics	
J. M. GAMBAUDO AND C. TRESSER	213
Finiteness of conjugacy classes of restricted block upper triangular matrices	
D. HANDELMAN	223
Polynomials with a positive power	
D. HANDELMAN	229
Spectral radii of primitive integral companion matrices and log concave polynomials	
D. HANDELMAN	231
Self-replicating tilings	
R. KENYON	239
Markov subgroups of $(\mathbb{Z}/2\mathbb{Z})^{\mathbb{Z}^2}$	
B. KITCHENS AND K. SCHMIDT	265
On the dimension of some graphs	
F. LEDRAPPIER	285
Synchronizing prefix codes and automata and the road coloring problem	
D. PERRIN AND M.-P. SCHÜTZENBERGER	295
A zero entropy, mixing of all orders tiling system	
S. MOZES	319
A cocycle equation for shifts	
W. PARRY	327
In general a degree 2 map is an automorphism	
W. PARRY	335
\mathbb{Z}^n versus \mathbb{Z} actions for systems of finite type	
C. RADIN	339
Principal vectors of commuting block maps	
F. RHODES	343
On the recurrence of countable topological Markov chains	
I. A. SALAMA	349

Substitutions, adic transformations, and beta-expansions B. SOLOMYAK	361
Finitary isomorphism of m -dependent processes M. SMORODINSKY	373
Constant-to-one factor maps and dimension groups P. TROW	377
Faces of Markov chains and matrices of polynomials S. TUNCEL	391
Classification of subshifts of finite type revisited J. B. WAGONER	423
Strong shift equivalence of matrices in $GL(2, \mathbf{Z})$ R. F. WILLIAMS	445
