Preface	vii
Equivariant Homology for $SL(2)$ of a $p$ -adic field PAUL BAUM, NIGEL HIGSON and ROGER PLYMEN	1
Cyclic homology and the Atiyah-Patodi-Singer index theorem EZRA GETZLER	19
$K$ -homology and the index theorem ERIK GUENTNER	47
On the $K$ -theory proof of the index theorem NIGEL HIGSON	67
Topology of covers and the spectral theory of geometric operators STEVE HURDER	87
Some applications of cyclic cohomology to the study of group $C^*$ -algebras RONGHUI JI	121
Spectral theory for self-adjoint operator extensions associated with Clifford algebras PALLE JORGENSEN	131
Averaging operators and open manifolds DAN KUCEROVSKY	151
$K$ -theory and a bivariable Fredholm index SHUANG ZHANG	155
