

# Contents

Preface	vii
Tomás Recio & Carlos Andradás <i>D. W. Dubois and the Pioneer Days of Real Algebraic Geometry</i>	1
<b>Papers on Real Algebraic Geometry</b>	
S. Akbulut <i>On Algebraic Structures of Manifolds</i>	11
Carlos Andradás and Jesús M. Ruiz <i>On Local Uniformization of Orderings</i>	19
Ralph Berr <i>Real Algebraic Geometry Over <math>p</math>-Real Closed Fields</i>	47
Ludwig Bröcker <i>On the Reduction of Semialgebraic Sets by Real Valuations</i>	75
Thomas C. Craven <i>Orderings for Noncommutative Rings</i>	97
Charles N. Delzell <i>Nonexistence of Analytically Varying Solutions to Hilbert's 17th Problem</i>	107
M. A. Dickmann <i>A Combinatorial Geometric Structure on the Space of Orders of a Field II</i>	119
M. J. González-Lopez and T. Recio <i>Formal Determination of Polynomial Consequences of Real Orthogonal Matrices</i>	141
Roland Huber and Manfred Knebusch <i>On Valuation Spectra</i>	167
M. Marshall <i>Minimal Generation of Basic Sets in the Real Spectrum of a Commutative Ring</i>	207

Albrecht Pfister	
<i>A New Proof of the Homogeneous Nullstellensatz for <math>p</math>-Fields, and Applications to Topology</i>	<b>221</b>
M. J. de la Puente	
<i>The Compatible Valuation Rings of the Coordinate Ring of the Real Plane</i>	<b>231</b>
Gilbert Stengle	
<i>Estimates for Parametric Nonuniformity in Representations of a Definite Polynomial as a Sum of Fourth Powers</i>	<b>243</b>
 <b>Papers on Quadratic Forms</b>	
Jón Kr. Arason, Richard Elman, and Bill Jacob	
<i>On Generators for the Witt Ring</i>	<b>247</b>
Eberhard Becker and Thorsten Wöermann	
<i>On the Trace Formula for Quadratic Forms</i>	<b>271</b>
W. Bichsel and M.-A. Knus	
<i>Quadratic Forms with Values in Line Bundles</i>	<b>293</b>
Martin Krüskemper	
<i>On Annihilators in Graded Witt Rings and in Milnor's <math>K</math>-Theory</i>	<b>307</b>
Ka Hin Leung	
<i>An Application of the Theory of Order Completions</i>	<b>321</b>
David B. Leep and A. S. Merkurjev	
<i>Growth of the <math>u</math>-Invariant Under Algebraic Extensions</i>	<b>327</b>
Ján Mináč	
<i>Remarks on Merkurjev's Investigations of the <math>u</math>-Invariant</i>	<b>333</b>
R. Parimala and W. Scharlau	
<i>On the Canonical Class of a Curve and the Extension Property for Quadratic Forms</i>	<b>339</b>
R. Parimala and R. Sridharan	
<i>Reduced Norms and Pfaffians Via Brauer-Severi Schemes</i>	<b>351</b>
R. Perlis, K. Szymiczek, P. E. Conner, and R. Litherland	
<i>Matching Witts With Global Fields</i>	<b>365</b>
Jonathan Shick	
<i>On Witt-Kernels of Function Fields of Curves</i>	<b>389</b>
V. Suresh	
<i>On the Canonical Class of Hyperelliptic Curves</i>	<b>399</b>
Epilogue	<b>405</b>
