

# Contents

Preface <i>George E. Andrews</i>	xii
Hans Rademacher 1892–1969 <i>Bruce C. Berndt</i>	xiii
On Rademacher’s multiplier system for the classical theta-function <i>Bruce C. Berndt and Ronald J. Evans</i>	1
Application of Dedekind eta-multipliers to modular equations <i>Harvey Cohn and Marvin I. Knopp</i>	9
Singularities, functional equations, and the circle method <i>Leon Ehrenpreis</i>	35
On Weyl’s inequality for eigenvalues <i>Joseph Lehner and G. Milton Wing</i>	81
The $GL(2)$ Rankin-Selberg convolution for higher level non-cuspidal forms <i>Daniel B. Lieman</i>	83
Congruences on the Fourier coefficients of modular forms on $\Gamma_0(N)$ <i>Ken Ono</i>	93
Diagonalizing Eisenstein series IV <i>Robert A. Rankin</i>	107
Generalized Dedekind $\eta$ -products <i>Sinai Robins</i>	119

Vanishing coefficients in the expansion of products of Rogers-Ramanujan type <i>Krishnaswami Alladi and Basil Gordon</i>	129
Schur's theorem, Capparelli's conjecture and $q$ -trinomial coefficients <i>George E. Andrews</i>	141
Modified convergence for $q$ -continued fractions defined by functional relations <i>Douglas Bowman</i>	155
A simple proof of an Aomoto type extension of the $q$ -Morris theorem <i>Kevin W. J. Kadell</i>	167
Congruences for certain generalized Frobenius partitions modulo $p^3$ <i>Louis Worthy Kolitsch</i>	183
Some asymptotic formulae for Ramanujan's mock theta functions <i>Richard J. McIntosh</i>	189
On the distribution of Dedekind sums <i>Roelof W. Bruggeman</i>	197
Wilf's conjecture and a generalization <i>Gert Almkvist</i>	211
An elementary proof of Wilf's conjecture <i>Tim Dokshitzer</i>	235
Cubic modular identities of Ramanujan, hypergeometric functions and analogues of the arithmetic-geometric mean iteration <i>Frank Garvan</i>	245
Residue periodicity in subgroup counting functions <i>Michael Grady and Morris Newman</i>	265
Addition theorems for $\sigma$ -finite groups <i>Xing-De Jia and Melvyn B. Nathanson</i>	275
On sums of three integral cubes <i>W. Conn and L. N. Vaserstein</i>	285
A note on character sums <i>J. B. Friedlander and H. Iwaniec</i>	295

Large factors of small polynomials <i>David W. Boyd</i>	301
Factors of period polynomials for finite fields, I <i>S. Gurak</i>	309
The Phragmén-Lindelöf theorem and modular elliptic curves <i>Liem Mai and M. Ram Murty</i>	335
Multidimensional beta and gamma integrals <i>Ronald J. Evans</i>	341
Rademacher, calculus of variations, inequalities, and relative error <i>Kenneth B. Stolarsky</i>	359
