

## Contents

Preface	ix
List of participants	xi

### Part I. Research Talks

Finite sums and products in Ramsey theory ELAINE A. TERRY	3
Computing an exact solution in interior-point methods for linear programming PAMELA J. WILLIAMS, AMR S. EL-BAKRY, AND RICHARD A. TAPIA	9
Just the facts, Jack: Truths and myths of automated theorem provers RODERICK MOTEN	31
On the Sendov conjecture for polynomials with real critical points JOHNNY E. BROWN	49
Chaos in relaxed Newton's method: The quadratic case L. BILLINGS, J. H. CURRY, AND V. ROBINS	63
Almost automorphic functions and applications to abstract evolution equations GASTON M. N'GUEREKATA	71
Moduli of complete intersections in weighted projective spaces A. FAUNTLEROY	77
Asymptotic behavior of characters of representations of semi-simple Lie groups DONALD R. KING	85

### Part II. Poster Presentations

A note on Riordan matrices ASAMOAH NKWANTA AND NATHANIEL KNOX	99
Robustness of parameter estimates in misspecified generalized linear mixed models KIMBERLY WEEMS	109

**Part III. Historical Articles**

Contemporary national mathematics education issues and the civic mathematician RICHARD A. TAPIA	117
A brief history of the National Association of Mathematicians, Inc JOHNNY L. HOUSTON	139
Black research mathematicians in the United States SCOTT. W. WILLIAMS	165
