Preface	ix
Weak convergence and deterministic approach to turbulent diffusion CLAUDE BARDOS, JEAN-MICHEL GHIDAGLIA, AND SPYRIDON KAMVISSIS	1
On hyperbolicity DEMETRIOS CHRISTODOULOU	17
Scattering theory in the energy space for a class of Hartree equations J. GINIBRE AND G. VELO	29
The relativistic Vlasov-Maxwell system in 2D and 2.5D ROBERT T. GLASSEY AND JACK SCHAEFFER	61
On the wave map problem MANOUSSOS G. GRILLAKIS	71
On the generalized Antonov stability criterion YAN GUO	85
On the smoothness of trajectories in incompressible perfect fluids TOSIO KATO	109
On the concentration of blow up solutions for the generalized KdV equation critical in $L^2$ CARLOS E. KENIG, GUSTAVO PONCE, AND LUIS VEGA	131
Heteroclinics to periodics of different homotopy type on $\mathbb{T}^2$ PAUL H. RABINOWITZ	157
Homoclinic orbits and spatiotemporal chaos JALAL SHATAH	173
Uniform decay estimates for some hyperbolic equations THOMAS C. SIDERIS	185
The Sine-Gordon and $\phi^4$ models perturbed with singular potentials LUIS VAZQUEZ	197
