

## Contents

|   |     |
|---|-----|
| Preface   | ix  |
| Conference lectures   | x   |
| Conference participants   | xii |
| Conference photo  | xiv |
| Galois cohomology of the classical groups<br>EVA BAYER-FLUCKIGER  | 1   |
| Symplectic lattices<br>ANNE-MARIE BERGÉ   | 9   |
| Universal quadratic forms and the Fifteen Theorem<br>J. H. CONWAY   | 23  |
| On the Conway-Schneeberger Fifteen Theorem<br>MANJUL BHARGAVA   | 27  |
| On trace forms and the Burnside ring<br>MARTIN EPKENHANS  | 39  |
| Equivariant Brauer groups<br>A. FRÖHLICH AND C.T.C. WALL  | 57  |
| Isotropy of quadratic forms and field invariants<br>DETLEV W. HOFFMANN  | 73  |
| Quadratic forms with absolutely maximal splitting<br>OLEG IZHBOLDIN AND ALEXANDER VISHIK                          | 103 |
| 2-regularity and reversibility of quadratic mappings<br>ALEXEY F. IZMAILOV  | 127 |
| Quadratic forms in knot theory<br>C. KEARTON  | 135 |
| Biography of Ernst Witt (1911–1991)<br>INA KERSTEN  | 155 |
| Generic splitting towers and generic splitting preparation of quadratic forms<br>MANFRED KNEBUSCH AND ULF REHMANN | 173 |

|  |     |
|--|-----|
| Local densities of hermitian forms<br>MAURICE MISCHLER   | 201 |
| Notes towards a constructive proof of Hilbert's theorem on ternary quartics<br>VICTORIA POWERS AND BRUCE REZNICK | 209 |
| On the history of the algebraic theory of quadratic forms<br>WINFRIED SCHARLAU                                   | 229 |
| Local fundamental classes derived from higher $K$ -groups: III<br>VICTOR P. SNAITH                               | 261 |
| Hilbert's theorem on positive ternary quartics<br>RICHARD G. SWAN  | 287 |
| Quadratic forms and normal surface singularities<br>C.T.C. WALL  | 293 |
