Foreword	xi
Preface	xiii
Photograph of Alfred Gray Memorial Bronze	xiv
Acknowledgements	xv
List of publications of Alfred Gray	xvii
List of participants	xxvii

Invited contributions

On the formality problem for symplectic manifolds IVAN K. BABENKO AND ISKANDER A. TAIMANOV	1
Osculating tubes and self-linking for curves on the three-sphere THOMAS F. BANCHOFF	10
Isoparametric functions and harmonic and minimal unit vector fields E. BOECKX AND L. VANHECKE	20
The Seiberg-Witten equations and almost-Hermitian geometry S. K. DONALDSON	32
Sculpture inspired by work with Alfred Gray: Kepler elliptic curves and minimal surface sculptures of the planets HELAMAN FERGUSON	39
Mesoscopic curvature and hyperbolicity MISHA GROMOV	58
Stable forms and special metrics NIGEL HITCHIN	70
A CR-Momentum Ansatz for nilpotent groups A. HUCKLEBERRY AND M. VÖLLER	90
Can tangent sphere bundles over Riemannian manifolds have strictly positive sectional curvature? O. KOWALSKI, M. SEKIZAWA, AND Z. VLÁŠEK	110

Volumes of geodesic balls and spheres associated to a metric connection with torsion VICENTE MIQUEL	119
Special isothermic surfaces and solitons EMILIO MUSSO AND LORENZO NICOLODI	129
The isoperimetric and Willmore problems ANTONIO ROS	149
Almost parallel structures SIMON SALAMON	162
Technical computing with Mathematica PAUL WELLIN	182
Complex geometry and representations of Lie groups JOSEPH A. WOLF	202

Communications

On the volume of compact spacelike hypersurfaces with hyperbolic boundary in Minkowski space JUAN A. ALEDO AND JOSÉ A. PASTOR	239
Stability of zero mean curvature surfaces in flat Lorentzian 4-manifolds LUIS J. ALÍAS AND BENNETT PALMER	244
Hitchin-Kobayashi correspondence for equivariant bundles on $X \times \mathbb{P}^1$ LUIS ÁLVAREZ-CÓNSUL AND OSCAR GARCÍA-PRADA	249
Hopf vesicles in $\mathbf{S}^3(\mathbf{1})$ J. ARROYO AND O. J. GARAY	258
Invariant nearly Kähler f -structures on homogeneous spaces VITALY V. BALASHCHENKO	263
An extension of A. Gray's investigations on small geodesic balls N. BOKAN, M. DJORIĆ, AND U. SIMON	268
An energy minimizing family of unit vector fields on odd-dimensional spheres VINCENT BORRELLI, FABIANO BRITO, AND OLGA GIL-MEDRANO	273
Is it admissible to linearize the Einstein equation in the presence of matter? LLUÍS BRUNA AND JOAN GIRBAU	277
Solutions of some conformally invariant equations of the first order JAROLÍM BUREŠ	281
On biharmonic maps RENZO CADDEO, STEFANO MONTALDO, AND PAOLA PIU	286
Characterizations of Pfaffian systems. Consequences in dimension five MARÍA A. CAÑADAS-PINEDO AND CEFERINO RUIZ	291
On a new class of contact Riemannian manifolds JONG TAEK CHO	296

Description of $(1, 2)$ -symplectic metrics on flag manifolds NIR COHEN, CAIO J. C. NEGREIROS, AND LUIZ A. B. SAN MARTIN	300
Complex surfaces with Betti numbers $b_1=1$, $b_2 > 0$ and finite quotients GEORGES DLOUSSKY	305
Hypercomplex nilpotent Lie groups ISABEL G. DOTTI AND ANNA FINO	310
\mathbb{C} -spaces of Iwasawa type and Damek-Ricci spaces MARIA J. DRUETTA	315
Deformations of constant mean curvature surfaces in half space models M. ELISA E. L. GALVÃO AND CÉLIA C. GÓES	320
The geometry of the skew-symmetric curvature operator in the complex setting PETER GILKEY AND RAINA IVANOVA	325
Representing minimal curves in \mathbb{C}^3 by differential operators HUBERT GOLLEK	334
Isometric immersions without positive Ricci curvature LUIS GUIJARRO	339
Natural Poisson and Jacobi structures on the tangent bundle of a pseudo-Riemannian manifold JOSEF JANYŠKA	343
On Alfred Gray's elliptical catenoid HUGO JIMÉNEZ AND SANTIAGO LÓPEZ DE MEDRANO	348
Sub-Riemannian geometry and non-holonomic mechanics JAIR KOILLER, PAULO R. RODRIGUES, AND PAULO PITANGA	353
Weil algebras of generalized higher order velocities bundles MIROSLAV KUREŠ	358
The variety of Lie algebras from certain Riemannian viewpoint JORGE LAURET	363
How to use MATHEMATICA™ to find cyclic surfaces of constant curvature in Lorentz-Minkowski space RAFAEL LÓPEZ	371
The Fuglede-Ishihara and Baird-Eells theorems for $p > 1$ E. LOUBEAU	376
Cohomology of nilmanifolds and Gontcharova's theorem DMITRI V. MILLIONSCHIKOV	381
Asymptotically holomorphic embeddings of contact manifolds in projective spaces VICENTE MUÑOZ, FRAN PRESAS, AND IGNACIO SOLS	386

Convergent star products on Fréchet linear Poisson algebras of Heisenberg type HIDEKI OMORI, YOSHIAKI MAEDA, NAOYA MIYAZAKI, AND AKIRA YOSHIOKA	391
Resolutions of 2-polyhedra by fake surfaces and embeddings into \mathbb{R}^4 ALEXANDER ONISCHENKO, DUŠAN REPOVŠ, AND ARKADY SKOPENKOV	396
Cayley 4-frames and a quaternion Kähler reduction related to Spin(7) LIVIU ORNEA AND PAOLO PICCINNI	401
Old and new structures on products of spheres MAURIZIO PARTON	406
1-Homogeneous sprays in Finsler manifolds L. DEL RIEGO	411
The Gysin sequence for riemannian flows JOSÉ IGNACIO ROYO PRIETO	415
On contact groupoids and Legendre bisections TOMASZ RYBICKI	420
Affine maximal tori intersecting a fixed one MARCOS SALVAI	425
On the asymptotic series of the heat content ALESSANDRO SAVO	428
Visualization of flat slant surfaces in \mathbb{C}^2 YOSHIHIKO TAZAWA	433
On solvable Lie groups without lattices ALEKSY TRALLE	437
Round Table Discussion	
Where does geometry go? A research and education perspective JEAN-PIERRE BOURGUIGNON, EUGENIO CALABI, JAMES EELLS, OSCAR GARCIA-PRADA, AND MISHA GROMOV	442
