Preface	vii
Program	ix
List of Participants	xiii
Remarks on the “Asymptotic Maximum Principle” LEV AIZENBERG	1
Some coefficient estimates for H^p functions CATHERINE BENETEAU and BORIS KORENBLUM	5
A statistical model of Riemann surfaces ROBERT BROOKS	15
Holomorphic retracts in domains with the locally uniformly linearly convex Kobayashi distance MONIKA BUDZYŃSKA	27
Common fixed points of holomorphic mappings and retracts of B_H^∞ MONIKA BUDZYŃSKA and TADEUSZ KUCZUMOW	35
Dynamics of spirallike functions MARK ELIN, ALEXANDER GOLDBARD, SIMEON REICH, and DAVID SHOIKHET	41
Invertibility preserving linear maps of Banach algebras LAWRENCE A. HARRIS	59
The dynamical zeta function and transfer operators for the Kac-Baker model J. HILGERT and D. MAYER	67
On operator matrices generating linear fractional maps of operator balls V.A. KHATSKEVICH, V.A. SENDEROV, and V.S. SHULMAN	93
Long-time asymptotics with geometric singularities in the spatial variables T. KRAINER and B.-W. SCHULZE	103
Grunsky inequalities of higher rank with applications to complex geometry and function theory SAMUEL L. KRUSHKAL	127
Asymptotic behaviour of the conformal representation of a Jordan domain with a small hole, and relative capacity MASSIMO LANZA DE CRISTOFORIS	155

Singular continuous spectrum for certain quasicrystal Schrödinger operators DANIEL LENZ	169
Measures orthogonal to the gradients of harmonic functions E. MALINNIKOVA	181
Q-homeomorphisms O. MARTIO, V. RYAZANOV, U. SREBRO, and E. YAKUBOV	193
Dynamic methods in the general theory of Cauchy type functional equations BORIS PANEAH	205
Exponential estimates for eigenfunctions of Schrödinger operators with rapidly increasing and discontinuous potentials V. S. RABINOVICH	225
A porosity result for attracting mappings in hyperbolic spaces SIMEON REICH and ALEXANDER J. ZASLAVSKI	237
Some properties of the quaternionic Cauchy-type integral for a piece-wise Liapunov surface of integration BARUCH SCHNEIDER and MICHAEL SHAPIRO	243
