CONTENTS

Preface ix

Francis Buekenhout
Diagram geometries for sporadic groups 1

Colin M. Campbell
Symmetric representations and linear groups 33

Leonard Chastkofsky
Rationality of certain zeta functions associated with modular representation theory 41

John H. Conway and Larissa Queen
Computing the character table of a Lie group 51

D. Dummit, H. Kisilevsky and J. McKay
Multiplicative products of η-functions 89

I.B. Frenkel, J. Lepowsky and A. Meurman
An E_8 approach to F_1 99

Robert L. Griess, Jr.
The Monster and its nonassociative algebra 121

William M. Kantor
Some consequences of the classification of finite simple groups 159

Horst Knörrer
Group representations and the resolution of rational double points 175

Geoffrey Mason
M_{24} and certain automorphic forms 223

Robert V. Moody
Generalized root systems and characters 245

Simon P. Norton
The uniqueness of the Fischer-Griess Monster 271

Edmund F. Robertson
Efficiency of finite simple groups and their covering groups 287

Mark A. Ronan
Buildings and sporadic groups 295

Stephen D. Smith
On the Head characters of the Monster simple group 303

Stephen D. Smith
Residual geometries for sporadic and classical groups - A survey 315

Robert Steinberg
Some consequences of the elementary relations in SL_n 335
