

TABLE OF CONTENTS

Preface	xi
List of Referees	xiii
Graph Theoretical Methods in Studying Stability ABRAHAM BERMAN and DANIEL HERSHKOWITZ	1
Computing a Banded Basis of the Null Space on the Denelcor HEP Multiprocessor M. W. BERRY and ROBERT J. PLEMMONS	7
A System-Theoretic Approach to Stability of Sets of Polynomials N. K. BOSE	25
Numerical Condition of the Algebraic Riccati Equation RALPH BYERS	35
Rank Deficient Least Squares and the Numerical Solution of Linear Singular Implicit Systems of Differential Equations STEPHEN L. CAMPBELL	51
Linear Methods for Nonlinear Problems J. CASTI	65
Zero Modules and Factorization Problems G. CONTE and A. M. PERDON	81
Sequential and Parallel Computations and Complexities for Determining Relative Primeness, Stability and Inertia BISWA NATH DATTA and KARABI DATTA	95
On Optimal Control VERA W. de SPINADEL	111
The Focal Point Method and Almost Linear Systems of Equations DAVID A. FIELD	121
Classification of Linear Systems SHMUEL FRIEDLAND	131

On the Partial Realization Problem and the Recursive Inversion of Hankel and Toeplitz Matrices PAUL A. FUHRMANN	149
Some Recent Results in Simultaneous System Design BIJOY K. GHOSH	163
Block Striped and Block Nested Matrices R. E. HARTWIG, F. J. HALL and I. J. KATZ	177
Semistability Factors and Semifactors DANIEL HERSHKOWITZ and HANS SCHNEIDER	203
State and Input Transformations for Reachable Systems - A Polynomial Approach D. HINRICHSSEN and D. PRÄTZEL-WOLTERS	217
On Mappings Between Covariance Matrices and Physical Systems T. KAILATH and H. LEV-ARI	241
Robust Multiple Eigenvalue Assignment by State Feedback in Linear Systems J. KAUTSKY and N. K. NICHOLS	253
Minimum Norm Pole Assignment Via Sylvester's Equation L. H. KEEL, J. A. FLEMING and S. P. BHATTACHARYYA	265
The Uniform Finite Generation Problem of Lie Groups and Its Application to Control Systems M. F. SILVA LEITE	273
On the Location of Spectrum of Matrix Polynomials L. LERER and M. TISMENETSKY	287
Two Matrices Which have Equal Corresponding Principal Minors RAPHAEL LOEWY	299
Cone Reachability for Differential Systems MICHAEL NEUMANN and RONALD J. STERN	303
Covariance Matrix Representation in Linear Filtering CHRISTOPHER C. PAIGE	309
A Condensed Form for Linear Systems Over Principal Ideal Domains R. V. PATEL	323
On Pairs of Multidimensional Matrices and Their Applications T. E. S. RAGHAVAN	339
Parametrization of the Flags Fixed by a Unipotent Matrix MARK A. SHAYMAN	355

An Introduction to the Stabilization Problem for Parametrized Families of Linear Systems EDUARDO D. SONTAG	369
Smith Invariants of a Product of Integral Matrices ROBERT C. THOMPSON	401
The Ricatti Equation and the Geometric Mean GEORGE TRAPP	437
On the Use of Unitary State-Space Transformations PAUL M. VAN DOOREN and MICHEL VERHAEGEN	447
How Near is a Stable Matrix to an Unstable Matrix? CHARLES VAN LOAN	465
An Approach to Exact and Approximate Modeling of Time Series JAN C. WILLEMS	479
Straight Bases of Finite Abelian Groups and a Jordan Factorization Theorem for Integer Matrices HARALD K. WIMMER	491
Poles, Zeros, and Lattices BOSTWICK F. WYMAN and MICHAEL K. SAIN	497
