

CONTENTS

Preface	xiii
I. <u>Basic theory of products of random matrices</u>	
A. Overviews:	
Limit theorems for products of random matrices: a comparison of two points of view JOSEPH C. WATKINS	5
Oseledec's multiplicative ergodic theorem: a proof THE EDITORS	23
Products of random matrices: convergence theorems Y. GUIVARC'H AND A. RAUGI	31
Examples of application of Oseledec's theorem. I Dimension and dynamical systems. II Poisson boundary of random walks on discrete groups of matrices FRANÇOIS LEDRAPPIER	55
B. Perturbation theory:	
Multiplicative ergodic theorems for random diffeomorphisms YURI KIFER	67
Furstenberg-Kesten results: asymptotic analysis STEVEN PINCUS	79
Stability of exponential growth rate for randomly perturbed random matrix products via Markov-chain arguments ERIC V. SLUD	87
Representation, positivity and expansion of Lyapunov exponents for linear stochastic systems VOLKER WIHSTUTZ	93
C. Theory of matrix products:	
On uniform contraction generated by positive matrices MACIEJ WOJTKOWSKI	109
D. Connections with spectral theory:	
Lyapunov exponents for some products of random matrices: exact expressions and asymptotic distributions CHARLES M. NEWMAN	121
II. <u>Spectral theory of random matrices</u>	
A brief survey on the spectral radius and the spectral distribution of large random matrices with i.i.d. entries CHII-RUEY HWANG	145

Eigenvalues and eigenvectors of large dimensional sample covariance matrices JACK W. SILVERSTEIN	153
Spectra for large dimensional random matrices Y. Q. YIN AND Z. D. BAI	161
III. <u>Applications to computer science, probability and statistics of products of random matrices</u>	
A. Applications to computer science and statistics:	
Products of random matrices and computer image generation PERSI DIACONIS AND MEHRDAD SHAHSHAHANI	173
Products of random matrices as they arise in the study of random walks on groups PERSI DIACONIS AND MEHRDAD SHAHSHAHANI	183
B. Applications to Markov chains in random environments:	
On products of random stochastic matrices ROBERT COGBURN	199
Convolution sequences of measures on the semigroup of stochastic matrices M. ROSENBLATT	215
Random walks on semigroups TZE-CHIEN SUN	221
C. Other applications to probability theory:	
A note on random systems with complete connections and their applications to products of random matrices THOMAS KAIJSER	243
Using random matrices to give recurrence and transience criteria for random walk in a random environment ERIC KEY	255
A contraction principle for certain Markov chains and its applications GÉRARD LETAC	263
IV. <u>Scientific applications of random matrices and their products</u>	
Lyapounov exponents and spectra for one-dimensional random Schroedinger operators S. KOTANI	277
The density of states of random Schroedinger operators ROBERT S. MAIER	287
Random matrices in nuclear physics and number theory M. L. MEHTA	295
Random matrices and waves in random media GEORGE PAPANICOLAOU	311
Demographic applications of random matrix products S. TULJAPURKAR	319

V. Supplements

Open problems	329
List of participants in Joint Summer Research Conference at Bowdoin College, 17-23 June 1984	335
Products of random matrices and related topics in mathematics and science: a bibliography JOEL E. COHEN	337
