

## Contents

Foreword	ix
Preface	xi
Acknowledgements	xiii
1. Cardinal Spline Functions	1
2. A Complex Contour Integral Representation of Basis Spline Functions (Compact Paths)	7
3. The Case of Equidistant Knots	19
4. Cardinal Exponential Spline Functions and Interpolants	23
5. Inversion of Laplace Transform	27
6. A Complex Contour Integral Representation of Cardinal Exponential Spline Functions (Non-Compact Paths)	37
7. A Complex Contour Integral Representation of Euler-Frobenius Polynomials (Non-Compact Paths)	49
8. Cardinal Exponential Spline Interpolants of Higher Order	57
9. Convergence Behaviour of Cardinal Exponential Spline Interpolants	61
10. Divergence Behaviour of Polynomial Interpolants on Compact Intervals (The Méray-Runge Phenomenon)	67
11. Cardinal Logarithmic Spline Interpolants	73
12. Inversion of Mellin Transform	79
13. A Complex Contour Integral Representation of Cardinal Logarithmic Spline Interpolants (Non-Compact Paths)	85

14.	Divergence Behaviour of Cardinal Logarithmic Spline Interpolants (The Newman-Schoenberg Phenomenon)	91
15.	Summary and Concluding Remarks	97
	References	101
	Subject Index	107
	Author Index	109
