

## Contents

<b>Preface</b> . . . . .	v
<b>List of Participants</b> . . . . .	vii
<b>Helmut Ulm : His Work and its impact on Recent Mathematics</b> R. GÖBEL . . . . .	1
<b>Extensions of Torsion-Complete <math>p</math>-Groups</b> K. BENABDALLAH, D. CUTLER and A. MADER . . . . .	11
<b>Plain Global Bases of Reduced Abelian <math>p</math>-Groups</b> K.-Y. HONDA . . . . .	23
<b>On Set Theory and the Balanced-Projective Dimension of <math>C_\Omega</math> Groups</b> PATRICK KEEF . . . . .	31
<b>Essentially Indecomposable Abelian <math>p</math>-Groups having a Filtration of Prescribed Type</b> D. CUTLER, A. MADER and CH. MEGIBBEN . . . . .	43
<b>Isomorphic Automorphism Groups of Primary Abelian Groups II</b> W. LIEBERT . . . . .	51
<b>Endomorphism Rings of Mixed Abelian Groups</b> W. MAY . . . . .	61
<b>The Endomorphism Ring of a Valuated Group</b> P. SCHULTZ . . . . .	75
<b>Quasi-Endomorphism Rings for a Class of Butler Groups</b> D. ARNOLD and C. VINSONHALER . . . . .	85

<b>Representations of Partially Ordered Sets and Abelian Groups</b>	
D. M. ARNOLD . . . . .	91
<b>Vector Spaces with Four Distinguished Subspaces and Applications to Modules</b>	
R. GÖBEL and C. SENDELHOFF . . . . .	111
<b>Abelian Groups <math>A</math> such that the Category of <math>A</math>-solvable Groups is Preabelian</b>	
U. ALBRECHT . . . . .	117
<b>Type Invariants of Torsion-Free Abelian Groups</b>	
O. MUTZBAUER . . . . .	133
<b>Separable Vector Groups</b>	
U. ALBRECHT and P. HILL . . . . .	155
<b>Bihomogeneous Groups</b>	
C. METELLI . . . . .	161
<b>On the <math>p</math>-Rank of <math>\text{Hom}(A, B)</math></b>	
H. P. GOETERS and J. D. REID . . . . .	171
<b>Torsion-free <math>E</math>-Uniserial Groups of Infinite Rank</b>	
M. DUGAS and J. HAUSEN . . . . .	181
<b><math>E</math>-Transitive Groups in <math>L</math></b>	
M. DUGAS and S. SHELAH . . . . .	191
<b>The Local Equivalence Theorem</b>	
P. HILL and CH. MEGIBBEN . . . . .	201
<b><math>E</math>-Modules</b>	
R. S. PIERCE . . . . .	221
<b>Some Applications of Abelian Group Theory to Modules</b>	
L. FUCHS . . . . .	241
<b>Finitely Generated Modules Over Valuation Domains</b>	
L. SALCE and P. ZANARDO . . . . .	249
<b>Torsion Divisible Dimension</b>	
T. H. FAY . . . . .	263

**Some Remarks on  $A$ -Radicals**

A.D. SANDS . . . . . 273

**Cardinality Restrictions on Preradicals**

K. EDA . . . . . 277

**Continuous Modules have the Exchange Property**

S. H. MOHAMED and B. J. MÜLLER . . . . . 285
