

CONTENTS

1. Introduction	155
1.1. General background	155
1.2. Some notation	158
2. Reducing the problem	159
2.1. Reduction to the case of weakly hereditary, commutative, unital Banach algebras	159
2.2. The entwining resolution	160
3. Some properties of projective maximal ideals	163
4. The trivial extension group	166
5. Lower norm bounds for almost triangular elements	172
6. The nontrivial extension group	175
7. The character space and the skeleton of a projective ideal	180
8. Non-isolated points on the Shilov boundary	184
References	194
