## *part one*      Computers

- 2      The Language of Computers    *Lord Bowden*  
15     Infinite Loops in Computer Programs    *Arthur Charlesworth*  
24     Social Processes and Proofs of Theorems and Programs    *Richard A. De Millo, Richard J. Lipton, and Alan J. Perlis*  
37     Computer Science and Mathematics    *Donald E. Knuth*  
48     Analysis of Algorithms: Coping with Hard Problems    *Gina Bari Kolata*  
52     The Computer Versus Kepler    *Owen Gingerich*  
59     Some Moral and Technical Consequences of Automation    *Norbert Wiener*  
66     Some Moral and Technical Consequences of Automation—A Refutation  
      *Arthur L. Samuel*

## *part two*      Mathematics in Art and Nature

- 71     Beauty in Mathematics    *François Le Lionnais*  
89     Architecture and the Mathematical Spirit    *Le Corbusier*  
99     Mathematics and Music    *Henri Martin*  
104    Does Pure Mathematics Have a Relation to the Sciences?    *Felix E. Browder*  
116    The Unreasonable Effectiveness of Mathematics in the Natural Sciences  
      *Eugene P. Wigner*  
126    Nonanalytic Aspects of Mathematics and Their Implication for Research and  
      Education    *Philip J. Davis and James A. Anderson*  
141    Mathematics and Population    *Nathan Keyfitz*

## *part three*      Counting, Guessing, Using

- 148    Statistics, Sports, and Some Other Things    *Robert Hooke*  
155    Statistics, Molière, and Henry Adams    *William Kruskal*  
164    Deciding Authorship    *Frederick Mosteller and David L. Wallace*  
173    The Size of Things    *Herbert A. Simon*  
179    Mathematicians in Industry—the First 75 Years    *Thornton C. Fry*  
188    Purity in Applications    *Tim Poston*  
193    Applied Mathematics Is Bad Mathematics    *Paul R. Halmos*  
201    Early Years of the Mathematics Program at ONR    *Mina Rees*

<i>part four</i>	<b>Sociology and Education</b>
209	Sex-Related Differences in Mathematics Achievement: Where and Why <i>Elizabeth Fennema</i>
222	Rigor Versus Intuition in Mathematics <i>John G. Kemeny</i>
230	Some Social Characteristics of Mathematicians and Their Work <i>Charles S. Fisher</i>
248	Mathematics as Propaganda <i>Neal Koblitz</i>
255	Can We Make Mathematics Intelligible? <i>R. P. Boas</i>
261	The Nature of Current Mathematical Research <i>Morris Kline</i>
274	Two Reviews of <i>Why the Professor Can't Teach</i> <i>Harry Pollard and Peter Hilton</i>
284	How to Teach a Robot <i>Marvin Minsky</i>
