1 The Minimalist Gamble	1
1.1 Minimalism in a nutshell	2
1.2 How to approach minimalism	5
1.3 Author's aims	11
2 The Minimalist Roots	15
2.1 The birth of modern biolinguistics	16
2.2 Levels of adequacy	17
2.3 The poverty of stimulus, and what must be done about it	20
2.4 Computational properties of the language organ	28
2.4.1 Early results	28
2.4.2 Later developments	39
2.4.3 Parameters	53
2.5 Conclusion	59
3 The Minimalist Core	61
3.1 The Government-Binding model	61
3.1.1 Why take Government-Binding as a starting point?	62
3.1.2 Some generalizations	66
3.2 Taking stock	83
3.3 The notion of 'program' and how it applies to minimalism	84
3.3.1 Program vs. theory	85
3.3.2 Lakatos on research programs	87
3.4 Conclusion	109

4	The Minimalist Impact	110
4.1	The Galilean style in science	111
4.2	<i>Why</i> -questions	114
4.3	Beauty in science	116
4.4	The Galilean style and biology	123
4.4.1	Linguistics as biology	125
4.4.2	Two scientific cultures	131
4.4.3	Back to laws of form	135
4.4.4	The evolution of the language faculty	138
4.4.5	Language and cognition	147
4.5	Conclusion	150
5	The Minimalist Highlights	152
5.1	<i>Caveat lector</i>	152
5.2	Evaluating the objections to the program	154
5.3	Specific minimalist analyses	159
5.3.1	Control	159
5.3.2	Copies and linearization	165
5.3.3	A constraint on multiple <i>wh</i> -fronting	168
5.3.4	Successive cyclicity	170
5.3.5	Bare phrase structure	172
5.3.6	Sluicing	178
5.3.7	Parasitic gaps	183
5.3.8	Existential constructions	186
5.4	Conclusion	190
6	The Minimalist Seduction	193
	<i>Glossary</i>	198
	<i>References</i>	207
	<i>Index</i>	235
