Preface	v
Phonemic and phonetic symbols	x
1 Introduction	1
1. Cognitive Linguistics	1
2. The language system	3
3. Symbolic units	5
4. The basic organization of grammar	8
5. Construction Grammar	10
6. Morphology	15
7. Compositionality	18
8. Morphological or word schemas	23
9. Cognitive Phonology	28
10. Summary	33
For further thought	34
2 Articulatory phonetics	35
1. How speech sounds are produced	35
2. The consonants	38
2.1. The place of articulation	38
2.2. The manner of articulation	39
2.3. Voicing	42
3. The vowels	44
3.1. Vowel articulation	46
4. Summary	51
For further thought	52
3 Sounds and meaning	53
1. Sounds and words	53
2. The phoneme	56
3. Minimal pairs	61
4. Contrastive or overlapping distribution	62
5. Complementary distribution	62
5.1. Allophones versus procedural and schematic knowledge	64

5.2.	Basic level and prototypes	68
5.3.	Stop allophones	70
5.4.	Vowel allophones	72
5.5.	Phonetic similarity	74
5.6.	Syllabification and allophones	75
5.7.	Voicing and voicelessness in allophones	77
6.	Free variation	79
7.	On the autonomy of phonological units vis-à-vis the symbolic units	82
8.	Vocalic differences between the phonetic and phonemic levels	85
9.	Phonological features	89
10.	Nasalization revisited	93
11.	A brief excursion into writing systems	95
12.	Summary	97
	For further thought	98
4	Alternation patterns	100
1.	Morphemes and allomorphs	100
2.	Morphological schemas or word level constructions	106
3.	What is in the lexicon?	116
4.	The velar nasal	121
5.	Phonotactics	129
6.	Morpheme internal 'changes'	135
6.1	Consonant alternations	135
6.2.	Velar softening	137
7.	The English Laxing	140
8.	Allomorphs and stress	143
9.	Suppletion	145
10.	Sandhi	146
11.	Linking	151
12.	Dissimilation	154
13.	Summary	155
	For further thought	156
5	Word stress	157
1.	What stress is and how it is assigned	157
2.	Morpheme types and word stress	163
3.	Separable and inseparable prefixes	167

4.	Stress pattern and syllable structure	169
5.	Secondary stress before primary stress	172
6.	Morphologically determined stress pattern	174
6.1.	Zero derivation	174
6.2.	Suffixes that carry primary stress	176
6.3.	Suffixes that determine the locus of the primary stress in the stem	177
7.	Schema constellations	193
8.	Entrenchment	199
9.	Compound stress	202
10.	Stress shift	204
11.	Summary	205
	For further thought	207
6	Intonation and grammatical constructions	208
1.	Propositions, assertions and intentions	208
2.	Default contours in grammatical constructions	211
3.	Interaction of defaults and non-defaults	219
4.	Frequencies of the defaults	226
5.	Broad and narrow focus revisited	228
6.	Predicate focus and event focus	231
7.	Phonological phrasing	233
8.	Intonational universals and discourse management	234
9.	Summary	236
	For further thought	237
7	Concluding remarks	239
	Chapter notes	243
	References	244
	Person index	262
	Subject index	266
