Table of Contents

Bioinformatics: Functional Genomics

HLA and HIV Infection Progression: Application of the Minimum Description Length Principle to Statistical Genetics 1
Peter T. Hraber, Bette T. Korber, Steven Wolinsky, Henry A. Erlich, Elizabeth A. Trachtenberg, and Thomas B. Kepler

Visualization of Functional Aspects of microRNA Regulatory Networks Using the Gene Ontology 13
Alkiviadis Symeonidis, Ioannis G. Tollis, and Martin Reczko

A Novel Method for Classifying Subfamilies and Sub-subfamilies of G-Protein Coupled Receptors 25
Majid Beigi and Andreas Zell

Integration Analysis of Diverse Genomic Data Using Multi-clustering Results 37
Hye-Sung Yoon, Sang-Ho Lee, Sung-Bum Cho, and Ju Han Kim

Bioinformatics: Sequence and Structure Analysis

Effectivity of Internal Validation Techniques for Gene Clustering 49
Chunmei Yang, Baikun Wan, and Xiaofeng Gao

Intrinsic Splicing Profile of Human Genes Undergoing Simple Cassette Exon Events 60
Andigoni Malousi, Vassilis Koutkias, Sofia Kouidou, and Nicos Maglaveras

Generalization Rules for Binarized Descriptors 72
Jürgen Paetz

Application of Combining Classifiers Using Dynamic Weights to the Protein Secondary Structure Prediction – Comparative Analysis of Fusion Methods 83
Tomasz Woloszynski and Marek Kurzynski

A Novel Data Mining Approach for the Accurate Prediction of Translation Initiation Sites 92
George Tzanis, Christos Berberidis, and Ioannis Vlahavas

SPSO: Synthetic Protein Sequence Oversampling for Imbalanced Protein Data and Remote Homology Detection 104
Majid Beigi and Andreas Zell

Biomedical Models

Markov Modeling of Conformational Kinetics of Cardiac Ion Channel Proteins 116
Chong Wang, Antje Krause, Chris Nugent, and Werner Dubitzky

Insulin Sensitivity and Plasma Glucose Appearance Profile by Oral Minimal Model in Normotensive and Normoglycemic Humans 128
Roberto Burattini, Fabrizio Casagrande, Francesco Di Nardo, Massimo Boemi, and Pierpaolo Morosini

Dynamic Model of Amino Acid and Carbohydrate Metabolism in Primary Human Liver Cells 137
Reinhard Guthke, Wolfgang Schmidt-Heck, Gesine Pless, Rolf Gebhardt, Michael Pfaff, Joerg C. Gerlach, and Katrin Zeilinger

The Probabilities Mixture Model for Clustering Flow-Cytometric Data: An Application to Gating Lymphocytes in Peripheral Blood 150
John Lakoumentas, John Drakos, Marina Karakantza, Nicolaos Zoumbos, George Nikiforidis, and George Sakellaropoulos

Integrative Mathematical Modeling for Analysis of Microcirculatory Function 161
Adam Kapela, Anastasios Bezerianos, and Nikolaos Tsoukias

Searching and Visualizing Brain Networks in Schizophrenia 172
Theofanis Oikonomou, Vangelis Sakkalis, Ioannis G. Tollis, and Sifis Micheloyannis

Databases and Grids

TRENCADIS – A Grid Architecture for Creating Virtual Repositories of DICOM Objects in an OGSA-Based Ontological Framework 183
Ignacio Blanquer, Vicente Hernandez, and Damià Segrelles

Minimizing Data Size for Efficient Data Reuse in Grid-Enabled Medical Applications 195
Fumihiko Ino, Katsunori Matsuo, Yasuharu Mizutani, and Kenichi Hagihara

Thinking Precedes Action: Using Software Engineering for the Development of a Terminology Database to Improve Access to Biomedical Documentation 207
Antonio Vaquero, Fernando Sáenz, Francisco Álvarez, and Manuel de Buenaga

Grid-Based Knowledge Discovery in Clinico-Genomic Data 219
Michael May, George Potamias, and Stefan Rüping

A Prospective Study on the Integration of Microarray Data in HIS/EPR 231
Daniel F. Polónia, Joel Arrais, and José Luis Oliveira

Web Services Interface to Run Protein Sequence Tools on Grid, Testcase of Protein Sequence Alignment 240
Christophe Blanchet, Christophe Combet, Vladimir Daric, and Gilbert Deléage

Semantics and Information Modelling

Integrating Clinical and Genomic Information Through the PrognoChip Mediator 250
Anastasia Analyti, Haridimos Kondylakis, Dimitris Manakanatas, Manos Kalaitzakis, Dimitris Plexousakis, and George Potamias

OntoDataClean: Ontology-Based Integration and Preprocessing of Distributed Data 262
David Perez-Rey, Alberto Anguita, and Jose Crespo

Language Modelling for the Needs of OCR of Medical Texts 273
Maciej Piasecki and Grzegorz Godlewski

Biomedical Signal Processing – Time Series Analysis

The Use of Multivariate Autoregressive Modelling for Analyzing Dynamical Physiological Responses of Individual Critically Ill Patients 285
Kristien Van Loon, Jean-Marie Aerts, Geert Meyfroidt, Greta Van den Berghe, and Daniel Berckmans

Time Series Feature Evaluation in Discriminating Preictal EEG States 298
Dimitris Kugiumtzis, Angeliki Papana, Alkiviadis Tsimpiris, Ioannis Vlachos, and Pål G. Larsson

Symbol Extraction Method and Symbolic Distance for Analysing Medical Time Series 311
Fernando Alonso, Loïc Martínez, Aurora Pérez, Agustín Santamaría, and Juan Pedro Valente

A Wavelet Tool to Discriminate Imagery Versus Actual Finger Movements Towards a Brain–Computer Interface 323
Maria L. Stavrinou, Liviu Moraru, Polyxeni Pelekouda, Vasileios Kokkinos, and Anastasios Bezerianos

Biomedical Image Analysis and Visualisation Techniques

A Fully Bayesian Two-Stage Model for Detecting Brain Activity in fMRI 334
Alicia Quirós, Raquel Montes Diez, and Juan A. Hernández

A Novel Algorithm for Segmentation of Lung Images 346
Aamir Saeed Malik and Tae-Sun Choi

An Evaluation of Image Compression Algorithms for Colour Retinal Images 358
Gerald Schaefer and Roman Starosolski

An Automated Model for Rapid and Reliable Segmentation of Intravascular Ultrasound Images 368
Eirini Parissi, Yiannis Kompatsiaris, Yiannis S. Chatzizisis, Vassilis Koutkias, Nicos Maglaveras, M.G. Strintzis, and George D. Giannoglou

Biomedical Data Analysis and Interpretation

Supervised Neuro-fuzzy Clustering for Life Science Applications 378
Jürgen Paetz

Study on Preprocessing and Classifying Mass Spectral Raw Data Concerning Human Normal and Disease Cases 390
Xenofon E. Floros, George M. Spyrou, Konstantinos N. Vougas, George T. Tsangaris, and Konstantina S. Nikita

Non-repetitive DNA Sequence Compression Using Memoization 402
K.G. Srinivasa, M. Jagadish, K.R. Venugopal, and L.M. Patnaik

Application of Rough Sets Theory to the Sequential Diagnosis 413
Andrzej Zolnierek

Data Integration in Multi-dimensional Data Sets: Informational Asymmetry in the Valid Correlation of Subdivided Samples 423
Qing T. Zeng, Juan Pablo Pratt, Jane Pak, Eun-Young Kim, Dino Ravnic, Harold Huss, and Steven J. Mentzer

Decision Support Systems and Diagnostic Tools

Two-Stage Classifier for Diagnosis of Hypertension Type 433
Michal Wozniak

Handwriting Analysis for Diagnosis and Prognosis of Parkinson's Disease 441
Atilla Ünlü, Rüdiger Brause, and Karsten Krakow

A Decision Support System for the Automatic Assessment of Hip Osteoarthritis Severity by Hip Joint Space Contour Spectral Analysis... 451
Ioannis Boniatis, Dionisis Cavouras, Lena Costaridou, Ioannis Kalatzis, Elias Panagiotopoulos, and George Panayiotakis

Modeling for Missing Tissue Compensator Fabrication Using RFID Tag in U-Health 463
O-Hoon Choi, Jung-Eun Lim, Hong-Seok Na, and Doo-Kwon Baik

The Effect of User Factors on Consumer Familiarity with Health Terms: Using Gender as a Proxy for Background Knowledge About Gender-Specific Illnesses 472
Alla Keselman, Lisa Massengale, Long Ngo, Allen Browne, and Qing Zeng

ICT for Patient Safety: Towards a European Research Roadmap 482
Veli N. Stroetmann, Daniel Spichtinger, Karl A. Stroetmann, and Jean Pierre Thierry

Author Index 495
