Part 1 Global markets and strategic risk exposures

1 International flow of funds, interest rate structure, and default spreads	3
Objectives	3
1.1 The globalization of markets	3
1.2 International trade and balance of payment	4
1.3 Capital flows in the global economic system	8
1.4 The international financial system	9
1.5 Global credit intermediation	11
1.6 Credit intermediation, interest rates and the role of financial institutions	14
1.7 Term structure of interest rates (yields, zero-coupon, and forward rates)	18
1.8 Liquidity	27
1.9 Credit risk and required return	28
1.10 The foreign exchange market	33
1.11 Foreign exchange rates	34
1.12 Purchasing power parity	35
1.13 Interest rate parity	36
Conclusion	39
Summary	39
Questions	40
Exercises	40
2 Interest rate, foreign exchange, and other commercial risk exposures	44
Objectives	44
2.1 Valuing financial assets and commercial cash flow streams	45
2.2 Financial and commercial cash flow exposures	55

2.3	Measuring interest rate gaps	58
2.4	Interest rate sensitivity and the concept of duration	61
2.5	Duration and interest rate risk	64
2.6	Measuring foreign exchange rate gaps	66
2.7	Portfolio optimization	68
2.8	An integrative risk management perspective	72
2.9	Modern risk management perspectives	78
	Conclusion	81
	Summary	81
	Questions	82
	Exercises	82

3 International financial markets and competitive developments

	Objectives	86
3.1	Credit intermediation and risk-transfer	86
3.2	Financial innovation and the effects of risk-transfer	95
3.3	Risk-transfer and financing mechanisms	101
3.4	Insurance and reinsurance	105
3.5	Financial derivatives markets	111
3.6	Regulatory and accounting issues	118
	Conclusion	120
	Summary	120
	Questions	121
	Exercises	122

Part 2 Exchange traded and OTC derivatives

4 Financial futures contracts and options on futures

	Objectives	127
4.1	The futures contract	127
4.2	Opening and closing transactions	128
4.3	Role of the exchange	129
4.4	Role of the clearinghouse	129
4.5	Market participants	135
4.6	Types of futures contracts	137
4.7	Commodity futures	138
4.8	Energy futures	139
4.9	Financial futures	140
4.10	Currency futures	141
4.11	Interest rate and bond futures	144
4.12	Stock index futures	149
4.13	Insurance futures	150
4.14	Option contracts and options on futures	151

4.15	Stock options	152
4.16	Options on futures contracts	161
4.17	Options on interest rate and bond futures	162
4.18	Options on stock index futures	163
	Conclusion	165
	Summary	165
	Questions	166
	Exercises	166
5	Forward agreements and option contracts	169
	Objectives	169
5.1	Forward agreements	169
5.2	Currency options	176
5.3	Option pricing	180
5.4	Profitability patterns	193
5.5	Option price sensitivity	197
5.6	Special option structures	202
5.7	Product developments	202
5.8	Double option products	203
5.9	Interest rate option agreements	206
	Conclusion	211
	Summary	211
	Questions	212
	Exercises	212
6	Swap agreements and other derivatives	214
	Objectives	214
6.1	Interest rate swap agreements	215
6.2	Currency swap agreements	220
6.3	Interest rate swap quotes	226
6.4	Currency and interest rate swap structures	229
6.5	Credit derivatives	236
6.6	Risk swaps	240
	Conclusion	244
	Summary	244
	Questions	245
	Exercises	246
Part 3 Hedging with financial derivatives		
7	Hedging with financial futures contracts and options on futures	251
	Objectives	251
7.1	Hedging with financial futures	251

7.2 Price relationships	264
7.3 Currency hedging	268
7.4 Hedging interest rate gaps	274
7.5 Hedging currency gaps	277
7.6 Managing interest rate risk	281
Conclusion	284
Summary	284
Questions	285
Exercises	286
8 Hedging with forward agreements and options	288
Objectives	288
8.1 Hedging interest rate risk	288
8.2 Hedging currency risk	293
8.3 Double option strategies	300
8.4 Ratio spreads	304
8.5 Portfolio hedge	316
8.6 Using options to establish a delta hedge	319
Conclusion	322
Summary	322
Questions	323
Exercises	323
9 Hedging with swap agreements and other derivatives	326
Objectives	326
9.1 Hedging with interest rate and currency swaps	326
9.2 Hedging with credit derivatives	342
9.3 Hedging with risk swaps	347
9.4 Alternative risk transfer	349
9.5 Hybrid instruments	350
Conclusion	351
Summary	351
Questions	352
Exercises	353

Part 4 Strategic risk management

10 Strategic exposures and real options	357
Objectives	357
10.1 The importance of a risk management focus	358
10.2 Risk and risk factors	364
10.3 Other types of risk	370
10.4 Dealing with the risks	375

10.5 An integrative perspective on strategic risk	377
10.6 Real option structures	381
Conclusion	392
Summary	392
Questions	393
Exercises	393
11 Managing strategic risk	397
Objectives	397
11.1 Getting to grips with uncertainty	398
11.2 Risk awareness	411
11.3 Risk management culture	412
11.4 Risk management as quality control	413
11.5 Strategizing through real options	415
11.6 Risk in the strategic management process	422
Conclusion	425
Summary	425
Questions	425
Exercises	426
Glossary	428
Index	441

Supporting resources

Visit www.pearsoned.co.uk/andersen to find valuable online resources

Companion Website for students

- Downloadable statistical tables for use in the practical application of models described in the book
- An online glossary to explain key terms

For instructors

- Complete, downloadable Instructor's Manual containing solutions to end of chapter questions and exercises found in the book
- PowerPoint slides that can be downloaded and used as OHTs

For more information please contact your local Pearson Education sales representative or visit www.pearsoned.co.uk/andersen
