HISTORY

IRMGARD SÜSS
The Mathematical Research Institute Oberwolfach Through Critical Times 3

JOHN TODD
Oberwolfach - 1945 19

HENRYK MINC
The Van Der Waerden Permanent Conjecture 23

INEQUALITIES FOR SUMS, SERIES, AND INTEGRALS

A. CLAUSING
On Quotients of L^p-means 43

ALEXANDER KOVAČEC
On an algorithmic method to prove inequalities 69

LÁSZLÓ LOSONCZI
Hölder-type inequalities 91

ZSOLT PÁLES
Inequalities for homogeneous means depending on two parameters 107

RAYMOND M. REDHEFFER
Easy proofs of hard inequalities 123

BRENT SMITH
Two trigonometic designs: One-sided Riesz products and Littlewood products 141

CHUNG-LIE WANG
Inequalities and mathematical programming 149

ALBERT W. MARSHALL AND INGRAM OLKIN
Inequalities via majorization - an introduction 165

INEQUALITIES OF COMBINATORICS AND MATRIX THEORY

RICHARD BELLMAN
Bounds of the greatest and the least characteristic roots of a positive definite matrix using powers of 2 191

RICHARD BELLMAN
On the second-greatest and second-least characteristic roots of a positive definite matrix 193

MOSHE GOLDBERG AND E.G. STRAUS
Combinatorial inequalities, matrix norms, and generalized numerical radii. II 195

E.R. LOVE
Inequalities between norms in sequence spaces 205

WALTER SCHEMPP
Identities and inequalities via symmetrization 219

FUNCTIONAL INEQUALITIES

J. ACZÉL, PL. KANNAPPAN, C.T. NG AND C. WAGNER
Functional equations and inequalities in rational group decision making 239

C. ALSINA
A functional inequality for distribution functions 247

MAREK CZERNI
Comparison theorem for a functional inequality 253

ROMAN GER
Almost approximately additive mappings 263

H.-H. KAIRIES
An inequality for Krull solutions of a certain difference equation 277

M. LACZKOVICH
A generalization of Kemperman's functional inequality $2f(x) \leq f(x + h) + f(x + 2h)$ 281

ZBIGNIEW POWAZKA
Differentiable solutions of a functional inequality 295

INEQUALITIES OF GEOMETRY AND TOPOLOGY

C. ALSINA AND B. SCHWEIZER
Menger-betweeness in α-simple spaces 307

T.F. BANCHOFF AND E.F. BECKENBACH
Circular and countercircular images of plane curves 321

PAUL EENIGENBURG, SANFORD S. MILLER, PETRU T. MOCANU AND MAXWELL O. READE
On a Briot-Bouquet differential subordination 339

JÜRG RÄTZ
On light-cone-preserving mappings of the plane 349

INTERPOLATION AND APPROXIMATION

RAVI P. AGARWAL
Some inequalities for a function having n zeros 371

G.E. CROSS
On functions with nonnegative divided differences 379

W. DICKMEIS AND R.J. NESSEL
On an inequality of Devore 385

A. JAKIMOVSKI AND D.C. RUSSELL
On classes of spline functions, and interpolation by functions with derivatives in pre-assigned spaces 395

DIFFERENTIAL INEQUALITIES AND FUNCTIONAL ANALYSIS

CATHERINE BANDLE
Comparison theorems for second- and fourth-order elliptic equations 419

DOBIESŁAW BRYDAK
A generalization of Pólya's theorem 427

DIETER K. ROSS AND ROGER J. WALLACE
Bounded estimates on solutions of a second-order differential equation of Duffing type 431

JOHANN SCHRÖDER
Generalized maximum principles for strongly coupled parabolic systems 439

PREM CHANDRA AND R.N. MOHAPATRA
Inequalities which yield inclusions among sequence spaces containing ℓ_p 455

F. FEHÉR
Exponents of submultiplicative functions and function spaces 471

I. FENYÖ
An error estimate for approximate solutions of equations 483

H. TÜRKE AND K. ZELLER
Riesz-mean-value theorem extended 491

REMARKS AND PROBLEMS

J. ACZÉL
A geometric application of majorization 499

RAVI P. AGARWAL
An integro-differential inequality 501

RAVI P. AGARWAL
Some best-constant problems 503

RAYMOND REDHEFFER
Answer to a question of Agarwal 503

S. BERAHA AND O. SHISHA
e 505

A. WILANSKY
A functional-equation problem 509

DOBIESŁAW BRYDAK
A problem concerning an inequality for linear operators 509

PREM CHANDRA AND R.N. MOHAPATRA
A problem concerning sequence spaces 511

BOGDAN CHOCZEWSKI
Remarks on a functional-inequality problem 513

BOGDAN CHOCZEWSKI
Remarks on Professor Ger's talk 515

Z. DARÓCZY
Inequalities for deviation means 517

WOLFGANG EICHHORN
Tax progression and decrease of income inequality 519

A. JAKIMOVSKI AND D.C. RUSSELL
Remarks on an inequality for the L^p-norm related to uniform convexity 521

A. KOVAČEC
A fixed-point theorem concerning contraction mappings 523

LÁSZLÓ LOSONCZI
Some mean-value problems 525

JÜRG RÄTZ
On locally autophorbic topological vector spaces 527

B. SAFFARI
Trigonometric polynomials and cross-means 529

P. VOLKMANN
Existenz einer zwischen zwei Funktionen v,w gelegenen Lösung von Funktionalgleichungen der Form $u(\Phi(x_1,\ldots,x_n)) = \varphi(u(x_1),\ldots,u(x_n))$, wenn v,w entsprechenden Funktionalgleichungen genügen

WOLFGANG WALTER
A problem concerning Schur-convex functions 533

WOLFGANG WALTER
A comparison theorem for difference inequalities 535

WOLFGANG WALTER
An inequality for contraction mappings 537

A. WILANSKY
Some problems concerning contraction mappings 539

ROMAN GER
Answer to a question of Professor Wilansky 541

E.F. BECKENBACH
On questions of Professor Wilansky concerning contraction transformations 543
