Preface	vii
<b>Chapter 1 Quadratic Equations</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Babylonian algebra . . . . .	2
1.3 Greek algebra . . . . .	5
1.4 Arabic algebra . . . . .	9
<b>Chapter 2 Cubic Equations</b>	<b>13</b>
2.1 Priority disputes on the solution of cubic equations . . . . .	13
2.2 Cardano's formula . . . . .	15
2.3 Developments arising from Cardano's formula . . . . .	16
<b>Chapter 3 Quartic Equations</b>	<b>21</b>
3.1 The unnaturalness of quartic equations . . . . .	21
3.2 Ferrari's method . . . . .	22
<b>Chapter 4 The Creation of Polynomials</b>	<b>25</b>
4.1 The rise of symbolic algebra . . . . .	25
4.1.1 L'Arithmetique . . . . .	26
4.1.2 In Artem Analyticem Isagoge . . . . .	29
4.2 Relations between roots and coefficients . . . . .	30
<b>Chapter 5 A Modern Approach to Polynomials</b>	<b>41</b>
5.1 Definitions . . . . .	41
5.2 Euclidean division . . . . .	43

5.3 Irreducible polynomials . . . . .	48
5.4 Roots . . . . .	50
5.5 Multiple roots and derivatives . . . . .	53
5.6 Common roots of two polynomials . . . . .	56
Appendix: Decomposition of rational fractions in sums of partial fractions . . . . .	58
<b>Chapter 6 Alternative Methods for Cubic and Quartic Equations</b>	<b>61</b>
6.1 Viète on cubic equations . . . . .	61
6.1.1 Trigonometric solution for the irreducible case . . . . .	61
6.1.2 Algebraic solution for the general case . . . . .	62
6.2 Descartes on quartic equations . . . . .	64
6.3 Rational solutions for equations with rational coefficients . . . . .	65
6.4 Tschirnhaus' method . . . . .	67
<b>Chapter 7 Roots of Unity</b>	<b>73</b>
7.1 Introduction . . . . .	73
7.2 The origin of de Moivre's formula . . . . .	74
7.3 The roots of unity . . . . .	81
7.4 Primitive roots and cyclotomic polynomials . . . . .	86
Appendix: Leibniz and Newton on the summation of series . . . . .	92
Exercises . . . . .	94
<b>Chapter 8 Symmetric Functions</b>	<b>97</b>
8.1 Introduction . . . . .	97
8.2 Waring's method . . . . .	100
8.3 The discriminant . . . . .	106
Appendix: Euler's summation of the series of reciprocals of perfect squares . . . . .	110
Exercises . . . . .	112
<b>Chapter 9 The Fundamental Theorem of Algebra</b>	<b>115</b>
9.1 Introduction . . . . .	115
9.2 Girard's theorem . . . . .	116
9.3 Proof of the fundamental theorem . . . . .	119
<b>Chapter 10 Lagrange</b>	<b>123</b>
10.1 The theory of equations comes of age . . . . .	123
10.2 Lagrange's observations on previously known methods . . . . .	127
10.3 First results of group theory and Galois theory . . . . .	138
Exercises . . . . .	150

<b>Chapter 11 Vandermonde</b>	<b>153</b>
11.1 Introduction . . . . .	153
11.2 The solution of general equations . . . . .	154
11.3 Cyclotomic equations . . . . .	158
Exercises . . . . .	164
<b>Chapter 12 Gauss on Cyclotomic Equations</b>	<b>167</b>
12.1 Introduction . . . . .	167
12.2 Number-theoretic preliminaries . . . . .	168
12.3 Irreducibility of the cyclotomic polynomials of prime index . . . . .	175
12.4 The periods of cyclotomic equations . . . . .	182
12.5 Solvability by radicals . . . . .	192
12.6 Irreducibility of the cyclotomic polynomials . . . . .	196
Appendix: Ruler and compass construction of regular polygons . . . . .	200
Exercises . . . . .	206
<b>Chapter 13 Ruffini and Abel on General Equations</b>	<b>209</b>
13.1 Introduction . . . . .	209
13.2 Radical extensions . . . . .	212
13.3 Abel's theorem on natural irrationalities . . . . .	218
13.4 Proof of the unsolvability of general equations of degree higher than 4	225
Exercises . . . . .	227
<b>Chapter 14 Galois</b>	<b>231</b>
14.1 Introduction . . . . .	231
14.2 The Galois group of an equation . . . . .	235
14.3 The Galois group under field extension . . . . .	254
14.4 Solvability by radicals . . . . .	264
14.5 Applications . . . . .	281
Appendix: Galois' description of groups of permutations . . . . .	295
Exercises . . . . .	301
<b>Chapter 15 Epilogue</b>	<b>303</b>
Appendix: The fundamental theorem of Galois theory . . . . .	307
Exercises . . . . .	315
<b>Selected Solutions</b>	<b>317</b>
<b>Bibliography</b>	<b>325</b>
<b>Index</b>	<b>331</b>
