

Contents

Introduction	1
Notations and Conventions	4
Chapter I. Modules	5
§ 1. Basic Definitions	5
§ 2. Sums and Products of Modules	8
§ 3. Finitely Generated Modules and Noetherian Modules	10
§ 4. Categories and Functors	13
§ 5. Exactness of Functors between Module Categories	16
§ 6. Projective and Injective Modules	19
§ 7. Semi-Simple Modules and Rings	23
§ 8. Tensor Products	26
§ 9. Bimodules	31
§ 10. Flat Modules	33
§ 11. Pure Submodules	36
§ 12. Regular Rings	39
§ 13. Coherent Rings	41
Exercises	44
Chapter II. Rings of Fractions	50
§ 1. The Ring of Fractions	50
§ 2. Orders in a Semi-Simple Ring	54
§ 3. Modules of Fractions	57
§ 4. Invertible Ideals and Hereditary Orders	59
Exercises	61
Chapter III. Modular Lattices	63
§ 1. Lattices	63
§ 2. Modularity	65
§ 3. Lattices with Chain Condition	66
§ 4. Distributive Lattices	69
§ 5. Continuous Lattices	72
§ 6. Pseudo-Complemented Lattices	74
§ 7. Closure Operators	76
§ 8. Galois Connections	77
Exercises	80

Chapter IV. Abelian Categories	82
§ 1. Equivalence of Categories	82
§ 2. Kernels and Cokernels	83
§ 3. Products and Coproducts	85
§ 4. Abelian Categories	87
§ 5. Pullbacks and Pushouts	89
§ 6. Generators and Cogenerators	93
§ 7. Functor Categories	95
§ 8. Limits and Colimits	98
§ 9. Adjoint Functors	103
§ 10. Morita Equivalence	106
Exercises	109
Chapter V. Grothendieck Categories	114
§ 1. Exactness of Direct Limits	114
§ 2. Injective Envelopes	117
§ 3. Finitely Generated Objects	121
§ 4. Locally Noetherian Categories	123
§ 5. The Krull-Remak-Schmidt-Azumaya Theorem	125
§ 6. Spectral Categories	128
§ 7. The Spectral Category of a Grothendieck Category	130
Exercises	133
Chapter VI. Torsion Theory	136
§ 1. Preradicals	136
§ 2. Torsion Theories	139
§ 3. Hereditary Torsion Theories	141
§ 4. Linear Topologies	143
§ 5. Gabriel Topologies	146
§ 6. Examples of Gabriel Topologies	148
§ 7. Stable Torsion	151
§ 8. TTF-Classes	153
§ 9. \mathfrak{F} -Divisible Modules	155
Exercises	156
Chapter VII. Hereditary Torsion Theories for Noetherian Rings	160
§ 1. Associated Prime Ideals	160
§ 2. Fully Bounded Noetherian Rings	164
§ 3. Topologies for a Fully Bounded Noetherian Ring	167
§ 4. Artin-Rees Modules and Stable Topologies	169
§ 5. Auxiliary Results on Commutative Localization	171
§ 6. The Topologies \mathfrak{F}_M^n for a Commutative Noetherian Ring	173
Exercises	177
Chapter VIII. Simple Torsion Theories	179
§ 1. The Jacobson Radical and Artinian Rings	179
§ 2. Semi-Artinian Modules and Rings	182

§ 3. Simple Torsion Theories	184
§ 4. Semi-Perfect Rings	186
§ 5. Perfect Rings	189
§ 6. Hereditary Torsion Theories for a Perfect Ring	191
Exercises	193
Chapter IX. Rings and Modules of Quotients	195
§ 1. Construction of Modules of Quotients	195
§ 2. \mathfrak{F} -Injective Envelopes	201
§ 3. The Ring of Quotients is a Bicommutator	205
§ 4. The Lattice of Saturated Submodules	207
§ 5. \mathfrak{F} -Invertible Ideals	209
Exercises	210
Chapter X. The Category of Modules of Quotients	213
§ 1. Giraud Subcategories	213
§ 2. Gabriel Topologies and Giraud Subcategories	216
§ 3. Rings of Quotients of Morita Equivalent Rings	218
§ 4. Representation of Grothendieck Categories	220
Exercises	223
Chapter XI. Perfect Localizations	225
§ 1. Epimorphisms of Rings	225
§ 2. Flat Epimorphisms of Rings	227
§ 3. Perfect Gabriel Topologies	230
§ 4. The Maximal Flat Epimorphic Ring of Quotients	233
§ 5. The Maximal Ring of Quotients as a Perfect Localization	235
§ 6. 1-Topologies and Rings of Fractions	237
§ 7. Finite Localizations	239
§ 8. The Endomorphism Ring of a Finitely Generated Projective Module	239
Exercises	242
Chapter XII. The Maximal Ring of Quotients of a Non-Singular Ring	244
§ 1. Standard Representation of Spectral Categories	244
§ 2. The Maximal Ring of Quotients	246
§ 3. The Maximal Ring of Quotients of a Boolean Ring	249
§ 4. The Lattice of Essentially Closed Ideals	250
§ 5. The Maximal Ring of Quotients of a Reduced Ring	253
§ 6. Flatness of the Maximal Ring of Quotients	256
§ 7. Imbedding Non-Singular Modules in Free Modules	257
Exercises	259
Chapter XIII. Finiteness Conditions on $\mathbf{Mod}(A, \mathfrak{F})$	262
§ 1. Compact Lattices of Saturated Submodules	262
§ 2. \mathfrak{F} -Noetherian Rings	263
§ 3. The Goldie Topology	265
§ 4. \mathcal{P} -Noetherian Rings	266

§ 5. The Canonical Topology of a Krull Domain	269
Exercises	271
Chapter XIV. Self-Injective Rings	273
§ 1. The Endomorphism Ring of an Injective Module	273
§ 2. Self-Injective Rings and Annihilator Conditions	274
§ 3. Quasi-Frobenius Rings	276
§ 4. Self-Injective Maximal Rings of Quotients	279
Exercises	281
Chapter XV. Classical Rings of Quotients	283
§ 1. Semi-Prime Ideals and the Prime Radical	283
§ 2. Rings of Quotients of Quotient Rings	284
§ 3. Orders in a Semi-Primary Ring	285
§ 4. Noetherian Orders in an Artinian Ring	287
§ 5. Orders in Self-Injective Rings	290
§ 6. Rings of Quotients of Group Algebras	292
Exercises	294
Bibliography	295
Index	305
