

# CONTENTS

1.	H. Bass, $K_2$ and Symbols .....	1
2.	A. Fröhlich and C. T. C. Wall, Foundations of equivariant algebraic K-theory. ....	12
3.	I. Bucur, Triangulated categories and algebraic K-theory .....	28
4.	A. Bak, On modules with quadratic forms .....	55
5.	M. Kneser, Normal subgroups of integral orthogonal groups .....	67
6.	W. C. Hsiang, A splitting theorem and the Künneth formula in algebraic K-theory .....	72
7.	C. B. Thomas, Obstructions for group actions on $S^{2n-1}$ .....	78
