CHAPTER I. LINEAR IDENTITIES

1

1. Basic reduction	1
2. Prime rings	4
3. Semiprime rings	8
4. Polynomial identities	11
5. Polynomial identity rings	16
6. Prime polynomial identity rings	20
7. Orders	24

CHAPTER II. BOUNDED REPRESENTATION DEGREE

31

8. Irreducible representations	31
9. Large centralizers	35
10. Modules	38
11. Reduction in special cases	44
12. Finite groups with r.b. n	49
13. Semiprime polynomial identity rings	52
14. Examples	56

CHAPTER III. NIL AND NILPOTENT IDEALS	61
15. Relative projectivity	61
16. Finite extensions	64
17. Abelian extensions	69
18. Semisimple rings	75
19. Locally finite groups	79
20. The nilpotent radical	83
21. More examples	87
CHAPTER IV. IDEMPOTENTS AND ANNIHILATORS	93
22. Trace of idempotents	93
23. Central idempotents	98
24. Regular rings	103
25. Annihilator ideals	106
26. Zero divisors	110
27. Graded polynomial rings	114
28. Algebraic rings	118
CHAPTER V. RESEARCH PROBLEMS	123
REFERENCES	141
NOTATION	145
INDEX	147
