

Contents

I. MODULES	1
1. Generalities	1
2. Free Modules	9
3. Cartesian Products and Direct Sums of Modules	11
4. Split Exact Sequences	15
5. The Group of Homomorphisms	16
6. Projective Modules	19
7. Injective Modules	24
II. STRUCTURE OF MODULES AND RINGS	33
1. Length of a Module	33
2. Artinian and Noetherian Modules	39
3. Artinian and Noetherian Rings	44
4. Simple and Semisimple Modules	47
5. Simple and Semisimple Rings	50
6. Radicals of Modules and Rings	58
7. Centralizer and Double Centralizer	73
III. SPECIAL RINGS AND MODULES	81
1. Finitely Generated Modules over Principal Ideal Domains	81
2. Rings of Linear Transformations of Vector Spaces	106
3. Von Neumann Regular Rings	129
4. The Group-Ring	134
Bibliography	157
Name Index	159
Subject Index	161
