INTRODUCTION 5

CHAPTER I: TORSION THEORIES
1. Torsion and torsion-free modules 9
2. The torsion functor 17
3. Dense and pure submodules 24
4. Relative injectivity and neatness 33
5. Absolute purity 47
6. Localization 54

CHAPTER II: THE SPACE R-tors
7. Order among torsion theories 69
8. Lattice structure on R-tors 76
9. Change of rings 85

CHAPTER III: SPECIAL TORSION THEORIES
10. Faithful torsion theories 97
11. Stable torsion theories 101
12. Semisimple torsion theories 107
13. Saturated torsion theories 119
14. Torsion theories satisfying chain conditions 125
15. Torsion theories satisfying finiteness conditions 141
16. Exact torsion theories 148
17. Perfect torsion theories 156

CHAPTER IV: THE LEFT SPECTRUM
18. Cocritical modules 181
19. Prime torsion theories 196
20. Semiprime torsion theories 214
21. Primary decomposition 225

CHAPTER V: DECOMPOSITION OF TORSION THEORIES
22. Jansian torsion theories 247
23. Direct decompositions 273

CHAPTER VI: REPRESENTATION THEORY
24. Topologies on subsets of R-prop 291
25. Representation of rings over R-sp 298

CHAPTER VII: EXAMPLES 305

INDEX OF NOTATION 327

INDEX OF TERMINOLOGY 329
