

CONTENTS

Introduction, iii

Chapter 1. Preliminaries on Modules, 1

Chapter 2. Central Separable Algebras, 11

Chapter 3. The Brauer Group of a Field, 25

Chapter 4. Lemmas, mostly about Separability, 37

Chapter 5. Complete Local Rings, 49

Chapter 6. The Brauer Group of some Special Domains, 59

Chapter 7. Galois Cohomology, 81

Chapter 8. Tsen's Theorem and $B(R) \rightarrow B(R[X])$, 95

Chapter 9. Cancellation, 103

Chapter 10. Faithfully Flat Descent, 111

Chapter 11. Splitting Rings over Local Rings, 123

Appendix, 130

Chapter 12. The Brauer Group is Torsion, 135

Chapter 13. The Full Brauer Group and Čech Cohomology
(by Lindsay N. Childs), 147

Bibliography, 163

Notation, 179

Index, 181
