Preface	v
Permanent Notation	xii
<i>Chapter 1: Algebraic preliminaries</i>	
1. Integral closure	1
2. Homological algebra	8
3. Localization	30
4. Dedekind domains	44
5. Completions and valuations	67
6. Radicals of rings	77
7. Semisimple rings and simple algebras	90
<i>Chapter 2: Orders</i>	
8. Definitions and examples	108
9. Reduced norms and traces	112
10. Existence of maximal orders; discriminants	125
11. Localization of orders	131
<i>Chapter 3: Maximal orders in skewfields (local case)</i>	
12. Uniqueness of maximal orders	135
13. Ramification index; inertial degree	138
14. Finite residue class field case	143
<i>Chapter 4: Morita equivalence</i>	
15. Progenerators	154
16. Morita correspondence	161
<i>Chapter 5: Maximal orders over discrete valuation rings</i>	
17. Maximal orders (complete local case)	170
18. Maximal orders (local case)	174
19. Ideals	181
20. Different, discriminant	184
