

CONTENTS

PREFACE		vii
I.	INTRODUCTION AND ELEMENTARY RESULTS	1
II.	FINITE FIELDS	7
	(A) Finite Fields and Their Polynomial Rings	8
	(B) Finite Division Rings	17
	(C) Skew-Polynomial Rings	22
	(D) Further Results on Finite Fields and Their Polynomial Rings	28
III.	FINITELY GENERATED MODULES OVER A RING	53
	(A) Preliminaries on Modules	54
	(B) Jordan-Hölder and Krull-Schmidt Theorems	58
	(C) Projective Modules	64
IV.	THE RADICAL	71
V.	NAKAYAMA'S LEMMA AND LOCAL RINGS	81
VI.	STRUCTURE THEOREM FOR FINITE COMMUTATIVE RINGS	94
VII.	IDEMPOTENTS	99
VIII.	FINITE SIMPLE RINGS	124
	(A) Finite Semi-Simple Rings	125
	(B) Simple Subrings of $M_n(k)$	133
	(C) The Galois Theory of $M_n(k)$	140
	(D) The Units of $M_n(k)$	156

(E)	Semi-Local Rings, The Standard Decomposition, and Algebras	161
IX.	EXAMPLES: THE MATRIX RING AND THE GROUP RING	178
	(A) Matrix Rings	178
	(B) The Group Ring	179
X.	BASIC RINGS AND CHECKERED MATRIX RINGS	190
XI.	DECOMPOSITION OF A RING AS IDEALS	202
XII.	MODULES OVER A FINITE RING	209
XIII.	THE POLYNOMIAL RING $R[X]$ PART I. REGULAR POLYNOMIALS	251
	(A) Regular Polynomials	252
	(B) R -Algebra Automorphisms of $R[X]$	266
XIV.	THE POLYNOMIAL RING $R[X]$ PART II. SEPARABLE LOCAL EXTENSIONS	277
XV.	THE GALOIS THEORY OF LOCAL COMMUTATIVE RINGS	291
XVI.	GALOIS RINGS	307
XVII.	LOCAL COMMUTATIVE RINGS	336
XVIII.	THE GROUP OF UNITS OF A COMMUTATIVE LOCAL RING	353
XIX.	THE ROLE OF THE GALOIS RING IN THE THEORY OF FINITE RINGS	368
XX.	THE SKEW-POLYNOMIAL RING $R[X; \sigma]$	388
XXI.	THE UNITS OF A FINITE RING	398
	BIBLIOGRAPHY	409
	INDEX	425
