

CONTENTS

PART 1 INTRODUCTION

- 1 Group Rings** 3
 - 1 Definitions, 3
 - 2 Twisted Group Rings, 13
 - 3 Tensor Products, 21
Exercises, 28

- 2 The Trace Map** 31
 - 1 Complex Idempotents, 31
 - 2 Places, 39
 - 3 The Power Map, 45
 - 4 Finite Groups, 55
Exercises, 63

- 3 The Augmentation Ideal** 67
 - 1 Augmentation Annihilators, 67
 - 2 Injective Modules, 74
 - 3 Filtrations in Characteristic p , 84
 - 4 Filtrations in Characteristic 0, 92
Exercises, 105

PART 2 LINEAR IDENTITIES

- 4 The Center** 113
 - 1 Finite Conjugate Groups, 113
 - 2 The Basic Reductions, 120

- 3 Idempotents and Annihilators, 131
- 4 The Classical Ring of Quotients, 146
- 5 The Maximal Ring of Quotients, 155
- Exercises, 163

5 Polynomial Identities 168

- 1 Standard Identities, 168
- 2 Subsets of Finite Index, 180
- 3 Primitive P.I. Algebras, 191
- 4 Central Polynomials, 202
- Exercises, 214

6 Bounded Representation Degree 223

- 1 Large Centralizers, 223
- 2 Finite Groups with r.b. n , 234
- 3 Semiprime P.I. Algebras, 245
- 4 Matrix Embedding, 250
- Exercises, 262

7 The Semisimplicity Problem 268

- 1 Nondenumerable Fields, 268
- 2 Finite Extensions, 273
- 3 Abelian Extensions and Separable Algebras, 282
- 4 Semisimple Rings, 291
- Exercises, 299

8 The Nilpotent Radical 304

- 1 The Controller Subgroup, 304
- 2 The N^* -radical, 315
- 3 A Conjecture, 322
- 4 Radical Ideals and Intersection Theorems, 333
- Exercises, 348

9 Primitive Rings 353

- 1 Extensions and the Center, 353
- 2 Some Basic Constructions, 364
- 3 Normal Abelian Subgroups, 378

- 4 Simple Augmentation Ideals, 387
- Exercises, 396

PART 3 FINITENESS PROPERTIES

- 10 Chain Conditions** 405
 - 1 Artinian Rings, 405
 - 2 Noetherian Rings, 419
 - 3 Homological Dimension, 430
 - 4 Goldie Rings, 451
 - Exercises, 461

- 11 Nilpotent Groups** 469
 - 1 Dimension Subgroups, 469
 - 2 The Artin–Rees Property, 485
 - 3 Hypercentral Rings, 500
 - 4 Ideal Correspondence, 516
 - Exercises, 524

- 12 Finite Dimensional Modules** 529
 - 1 Solvable and Finite Linear Groups, 529
 - 2 Philip Hall’s Problem, 537
 - 3 Some Residually Finite Groups, 545
 - 4 Finite Endomorphism Dimension, 556
 - Exercises, 575

- 13 The Zero Divisor Problem** 582
 - 1 Unique Product Groups, 582
 - 2 Ordered Groups, 592
 - 3 Supersolvable Groups, 605
 - 4 Polycyclic-by-finite Groups, 616
 - Exercises, 637

- 14 Isomorphism Questions** 644
 - 1 Central Subfields, 644
 - 2 Finite Metabelian Groups, 660

- 3 Infinite Abelian Groups, 675
- 4 Fields of the First Kind, 688
Exercises, 697
