

## TABLE OF CONTENTS

Chapter 0.	Preliminaries . . . . .	1
Chapter 1.	Rings with no $ G $ -torsion: existence of fixed elements, the prime radical and Jacobson radical of $R^G$ . . . . .	6
Chapter 2.	Simple rings: inner and outer automorphisms, simple fixed rings, $R$ as an $P^G$ -module . . . . .	19
Chapter 3.	Inner and outer automorphisms of semiprime rings . . . . .	38
Chapter 4.	Rings with no nilpotent elements: existence of fixed elements and traces . . . . .	55
Chapter 5.	Chain conditions . . . . .	69
Chapter 6.	Polynomial identities . . . . .	89
Chapter 7.	Skew group rings and applications to modules . . . . .	107
Bibliography	. . . . .	119
Supplementary Bibliography	. . . . .	123
Subject Index	. . . . .	124
