C O N T E N T S

	Preface	*page* vii
	Index of notation	ix
1	Modules	1
	1.1 *Direct sums*	3
	1.2 *Free modules*	5
	1.3 *Projective modules*	5
2	The Grothendieck Group, K_0R	8
	2.1 *Bimodules and tensor products*	12
	2.2 K_0 *of a commutative ring*	15
	2.3 *The map* $K_0f : K_0R \to K_0S$	16
	2.4 *Products of rings*	19
	2.5 *Matrix rings*	23
	2.6 *The Jacobson radical, Wedderburn-Artin theory, and* K_0 *of semi-local rings*	25
	2.7 *The reduced group* $\tilde{K}_0R$	28
3	K_0 of Commutative Rings, and the Picard Group	30
	3.1 *Rings of fractions*	30
	3.2 *Modules of fractions*	31
	3.3 *Localization*	33
	3.4 *Dual modules*	36
	3.5 *Exterior powers*	43
	3.6 *The prime spectrum and Zariski topology*	49
	3.7 *Connectedness in Spec R*	52
	3.8 *The determinant map det* : $K_0R \to Pic\ R$	57
4	K_0 of Integral Domains and Dedekind Domains	61
	4.1 *Examples: the calculation of* $K_0\mathbb{Z}[\sqrt{-d}]$ *for small d*	71

5 Categories 78
5.1 *Categories with product* 83
5.2 *Categories with product and composition* 92

6 Whitehead Groups 97
6.1 $K_1\underline{C}$ *as a direct limit* 102
6.2 K_1 *of a ring* 107
6.3 *Determinants and* SK_1 112
6.4 *The non-stable* K_1 *of a commutative ring* 116
6.5 *Dieudonné determinants, and* K_1 *of semi-local rings* 122

7 Exact Sequences 141
7.1 *Cartesian squares, and the Mayer-Vietoris sequence* 154

8 Steinberg Groups and K_2R 183
8.1 *Generators for* K_2R*: the symbols* $\{\alpha, \beta\}$ 193
8.2 *Generators for* K_2R*: the symbols* $\langle a, b\rangle$ 208
8.3 *The calculation of* $K_2(\mathbb{Z}/n\mathbb{Z})$ *and* $SK_1(\mathbb{Z}, n\mathbb{Z})$ 224
8.4 *The non-triviality of* K_2R 229
8.5 *Generators for* K_2 *of a semi-local ring* 232
