

Preface	iii
Chapter 1	
BASIC PROPERTIES OF POWER SERIES RINGS	1
1. Some Basic Facts	1
2. Zero-divisors	6
3. Nilpotent Elements	9
4. Properties Stable Under Passage from D to $D[[X]]$	13
Chapter 2	
PATHOLOGY IN $R[[X]]$	21
5. Dimension Theory of $R[[X]]$	21
6. Valuation Overrings of $D[[X]]$	33
7. The Quotient Field of $D[[X]]$	39
8. Integral Dependence in Power Series Rings	47
9. Power Series Rings Over von Neumann Regular Rings	52
10. The Cancellation Problem for Power Series Rings	65
Chapter 3	
R-HOMOMORPHISMS OF $R[[X_1, \dots, X_n]]$	69
11. Preliminaries and the Theorem of Eakin-Sathaye	70
12. Applications of the Theorem of Eakin-Sathaye	75
13. Computing $I_c(R)$	81
REFERENCES	91
