

Contents

<i>Preface</i>	v
Chapter I	
1. Preliminaries	1
2. The Whitehead Group	2
3. Cohn's Example	7
4. $E_n(A)$ is Normal in $GL_n(A)$, $n \geq 3$	14
5. Localization Theorem	20
Chapter II	
1. Generalities on Resultants	27
2. Serre's Problem	29
3. Special Linear Group over Polynomial Rings	41
Chapter III	
1. Suslin's Analogue of Horrocks's Theorem	50
2. Structure of $SL_n(k)$ (Bruhat Decomposition)	55
3. Structure of $E_n(A[X, X^{-1}])$	66
4. Structure of $E_n(A[X, X^{-1}]) \cap GL_n(A[X, X^{-1}], \underline{m}[X, X^{-1}])$	81
Chapter IV	
1. Projective Modules	87
2. Serre's Problem	90
Chapter V	
1. $(x_0, x_1, x_2^2, \dots, x_n^n)$ is Completable	94
2. $(x_0^{r_0}, x_1^{r_1}, \dots, x_n^{r_n})$ is Completable if $n! \mid r_0 r_1 \dots r_n$	99
