

CONTENTS

PREFACE	iii
CHAPTER 0. PRELIMINARIES	1
CHAPTER I. PRERADICALS AND THEIR PROPERTIES	15
I.1 Basic Definitions and Properties	15
I.2 Hereditary and Cohereditary Preradicals	19
I.3 Stable and Costable Preradicals	25
I.4 Composition of Preradicals	28
I.5 More About Radicals and Idempotent Preradicals	36
I.6 Torsion Submodules and Ideals	40
I.7 Centrally Splitting Preradicals	44
I.8 Preradicals and Change of Rings	46
I.9 Preradicals and Ring Direct Sums, Morita Equivalence and P-Equivalence	49
I.10 The Hereditary Preradicals \underline{Z} and Soc	51
I.11 The Radicals \underline{P} and \underline{J}	57
CHAPTER II. IDEMPOTENT RADICALS AND TORSION THEORIES	67
II.1 Torsion Theories	67
II.2 Generation of Torsion Theories	71
II.3 Torsion n-Theories	74
II.4 Some Important Idempotent Radicals and Torsion Theories	76
CHAPTER III. FILTERS AND RADICAL FILTERS OF LEFT IDEALS	83
III.1 Basic Definitions and Properties	83
III.2 Connections Between Filters and Preradicals	86
III.3 Generation of Filters and Radical Filters	89
III.4 Special Types of Filters and Radical Filters	94

CHAPTER IV. INJECTIVITY AND PROJECTIVITY	101
IV.1 Injectivity and Projectivity With Respect to a Pair of Preradicals	101
IV.2 Injectivity and Projectivity With Respect to a Preradical	111
IV.3 Quasinjective and Quasiprojective Modules	114
IV.4 Rational and Corational Extensions	118
IV.5 Tertiary Decompositions	121
IV.6 Tertiary Decompositions - A Continuation	126
IV.7 Pseudoinjective and Pseudoprojective Modules	131
CHAPTER V. SEMIPERFECT AND PERFECT RINGS	135
V.1 Idempotents	135
V.2 Semiperfect Rings	140
V.3 Perfect Rings	143
V.4 Superhereditary Preradicals and Perfect Rings	150
V.5 Hereditary Preradicals and Semiartinian Rings	152
CHAPTER VI. SPLITTING PROPERTIES	159
VI.1 Costability	159
VI.2 Central Splitting	163
VI.3 Stability	166
VI.4 Several Consequences	172
VI.5 Primary Decomposition	178
CHAPTER VII. SPLITTING PROPERTIES - A CONTINUATION	185
VII.1 Cyclic Splitting Property	185
VII.2 Finitely Generated Splitting Property and Bounded Splitting Property	189
VII.3 Splitting Property	195
VII.4 Splitting Hereditary Radicals over Commutative Rings	200
CHAPTER VIII. PRERADICALS AND DIMENSIONS	205
VIII.1 Idempotent Radicals and Homological Dimensions	205
VIII.2 Homological Dimensions of Torsion and Torsionfree Classes	208
APPENDIX A. RINGS WITH TRIVIAL ORTHOGONAL Ext-THEORIES	213
A.1 Basic Properties	213
A.2 Preradicals over Left T-Rings	214

A.3	Left T-Rings of Types 1 and 2	216
A.4	Left T-Rings of Types 3, 4, and 5	217
A.5	Commutative T-Rings	218
A.6	Commutative Rings with Trivial Orthogonal \otimes -Theories	219
APPENDIX B. EXAMPLES		221
B.1	The Ring Z of Integers	221
B.2	The Ring $Z(4)$ of Integers Modulo 4	223
B.3	The Ring X of Differential Polynomials	223
B.4	The Ring U of Upper Triangular 2×2 Matrices over $Z(2)$	224
B.5	The $(Z-Q)$ -Ring W	225
B.6	The $\langle 0,1 \rangle$ -Ring V	226
B.7	The Rings of Infinite Matrices	227
B.8	Miscellanea	227
BIBLIOGRAPHY		229
