

CONTENTS

I.	Introduction	1
II.	Graduated and graduable orders	
	a. Definition and characterization of graduated orders	7
	b. Graduable orders	21
	c. Some properties of graduated orders, graduated hulls	35
III.	The conductor formula for graduated hulls of selfdual orders	43
IV.	Selfdual orders with decomposition numbers 0 and 1	59
V.	Blocks of multiplicity 1	80
VI.	Examples of group rings	92
VII.	The principal 2-block of $SL_2(q)$ for odd prime powers q	109
VIII.	Blocks with cyclic defect groups	131
